TRANSBALTICA XII: Transportation Science and Technology

2022-01-24

this book reports on innovative research and developments in the broad field of transportation it covers solutions relating to intelligent vehicles and infrastructure energy and combustion management vehicle dynamics and control as well as research on human factors logistics and security contributions are based on peer reviewed papers presented at the 12th international scientific conference transbaltica transportation science and technology held virtually from vilnius gediminas technical university lithuania on september 16 17 2021 all in all this book offers extensive information on modern transport systems with a good balance of theory and practice

Reliability and Statistics in Transportation and Communication

2020-03-28

this book reports on cutting edge theories and methods for analyzing complex systems such as transportation and communication networks and discusses multi disciplinary approaches to dependability problems encountered when dealing with complex systems in practice the book presents the most noteworthy methods and results discussed at the international conference on reliability and statistics in transportation and communication relstat which took place in riga latvia on october 16 19 2019 it spans a broad spectrum of topics from mathematical models and design methodologies to software engineering data security and financial issues as well as practical problems in technical systems such as transportation and telecommunications and in engineering education

TRANSBALTICA XI: Transportation Science and Technology

2020-01-19

this book gathers papers presented at the 11th international scientific conference transbaltica transportation science and technology held on may 2 3 2019 at vilnius gediminas technical university lithuania it covers cutting edge issues concerning research and development of modern transport systems the chapters written by an international group of experts discuss novel and smart solutions in the area of vehicle engineering including environmentally friendly technologies topics relating to traffic safety modeling and control and solutions and challenges in modern logistics further

topics include multimodal transport and vehicle automation providing comprehensive information and ideas concerning innovative transportation technologies and challenges this book offers a valuable resource for transportation researchers and practitioners including engineers managers and decision makers in the field

Vision Zero for Sustainable Road Safety in Baltic Sea Region

2019-06-17

this book gathers papers presented at the international conference vision zero for sustainable road safety in baltic sea region held on december 2018 at vilnius gediminas technical university in vilnius lithuania taking as a starting point the multi national road traffic safety program vision zero originated in sweden in 1995 the book aims at showing the current situation in different countries in terms of achieved results and new challenges in both policy implementation and available technologies a special emphasis is given to themes such as safety of smart vehicles human factors public education and urban planning the book offers an extensive source of information and ideas concerning innovative transportation technologies and infrastructure it addresses both researchers and decision makers in this field
