we are all using dangerous outdated old economic strategies to protect and grow our money in the so called new economy most of us don't even know it every economy is in some sense new however applying the rules from an older economy to a newer one during times of transition is a recipe for financial ruin economic transitions have been around for centuries the difference is that now they are worldwide in scope and affect everything rather than local in nature with limited affects while you sleep at night while you go to work each day something insidious is actually stealing your financial future it isn't anyone's fault really there is a massive reallocation of wealth as we transition into the new economy there are two sides to this story because of the changing rules of money the greatest transfer of wealth in the nation and the world is now unfolding money is about to flow away from the financially uninformed and flow towards the financially well informed in the years ahead this is nothing new really money has always worked this way the good news is that average members of the public now have more ways than ever before to understand this process and to take appropriate action i am sure you are aware of the rising price of gold that's been going on for almost 10 years now most recently gold started climbing with even greater speed history repeats itself again and again whenever governments start to dilute their money investors transfer their money into gold gold has intrinsic value and will always prevail in any economy what most non investors and investors including yourself probably you don't realize is that although gold is a great way to preserve your wealth it's silver that could actually make you rich the price of gold has already risen dramatically but silver is just beginning its climb nine reasons why silver is a unique wealth building instrument silver like gold has intrinsic value silver has been in a commodity bull cycle since 2000 silver is a safe hedge against currency inflation silver is a security choice during times of financial crisis silver is rarer than gold silver is used in 90 of all electronics and its mostly non renewable silver inventories are very low silver leasing the scam will be exposed soon silver investment markets are expanding thanks to the chinese what you will learn from building wealth with silver you will discover why the federal reserve was created and why you and i have been kept in the dark about its true purpose you will find out why the u.s. dollar is quietly being destroyed without fanfare and the reason this process is being publically denied and covered up you will see why unemployment numbers along with many other economic figures are rigged and how we're being lied to about their true significance the insights you get from the first few chapters alone can change your life even if you were to study at harvard for five years which would cost you by the way over 95,000 you would not have the knowledge you need to get any closer to this kind of insider information learn why silver is the best investment opportunity right now get the facts on silver production and consumption and all the details behind silver's projected five to eight fold increase over the next several months
