Wild Law - In Practice

2014-03-05

wild law in practice aims to facilitate the transition of earth jurisprudence from theory into practice earth jurisprudence is an emerging philosophy of law coined by cultural historian and geologian thomas berry it seeks to analyse the contribution of law in constructing maintaining and perpetuating anthropocentrism and addresses the ways in which this orientation can be undermined and ultimately eliminated in place of anthropocentrism earth jurisprudence advocates an interpretation of law based on the ecocentric concept of an earth community that includes both human and nonhuman entities addressing topics that include a critique of the effectiveness of environmental law in protecting the environment developments in domestic constitutional law recognising the rights of nature and the regulation of sustainability wild law in practice is the first book to focus specifically on the practical legal implications of earth jurisprudence

Reintegrative Justice in Practice

2016-04-08

recent years have seen the development of a growing international literature on restorative justice community justice and reintegrative alternatives to formal criminal justice processes this literature is stronger on theory and advocacy than on detailed evaluative studies it often relies for its practical examples on the presumed historical practices of the indigenous peoples of colonised territories or on attempts to revive or promote modified versions of these in a modern context which has led to debates about how far modern communities can provide a viable setting for such initiatives this book provides a unique study of the practice of traditional reintegrative community justice in a european

society the parish hall enquiry phe in the channel island of jersey this is an ancient institution based on an informal hearing and discussion of a reported offence with the alleged offender and other interested parties carried out by centeniers honorary police officers elected to one of jersey s twelve parishes it is still in regular use as an integral part of a modern criminal justice system and it usually aims to resolve offences without recourse to formal prosecution in court helen miles and peter raynor s research arising from direct observation contributes to the literature on what works in resolving conflicts and influencing offenders and their detailed case studies of how problems are addressed gives a hands on flavour of the process the authors also document the aspects of community life in jersey that facilitate or hinder the continuation of the phes drawing out the implications of these findings for wider debates about the necessary and sufficient social conditions for reintegrative justice to succeed
