## ***Situating Phenomenological Psychopathology: Subjective Experience Within the World***

2023-09-28

the discipline of phenomenological psychopathology has historically focused on elucidating the ways in which persons with psychiatric illnesses experience themselves and the world early pioneers in this field were aware of the impact of uncontrollable life events on the onset and course of severe illness such as jaspers recognition that environmental events may stimulate or enhance certain innate potentialities for the development of a disorder furthermore the role of environment and life events in the development and onset of psychiatric illness has been well documented for example there is a clear relationship between the development of psychotic symptoms and life stressors including adverse childhood events urban living and migration however relatively little attention with some notable exceptions has been devoted to exploring the features of those experienced worlds and how they may impact the trajectory of severe illnesses such as schizophrenia depression and personality disorders

john dewey s philosophy is becoming extremely relevant for our times from being one of the best known thinkers in the world in the early 1900s dewey s ideas went into near oblivion for decades now it seems that his philosophy was well ahead of his time most notably he created a new philosophy of experience that enables us to rethink our place within nature the main innovation of dewey s thinking was his new way of understanding the experience of all living beings influenced by the theory of evolution he understood experience as a continuously developing interaction between acting individuals and their environments from this perspective dewey detected the fragmentation of experiences inherent within the modern way of life the tools he developed to counter this are based upon learning collectively from individual experiences john dewey s ecology of experience reveals the relevance of dewey s ideas for our contemporary social political and ecological crises it creates a comprehensive picture of his thinking on human psychology education ethics science art and religion in its conclusion the book assesses the main theme in his political philosophy the democratic way of life
