in this reference volume more than 200 fictional feature length movies with a primary focus on an athletic endeavor are discussed including comedies dramas and biopics brief summaries and credit information are provided for an additional 200 films and appendixes include made for television movies and documentaries

Thrombosis and Bleeding Disorders

2014-06-28

first published in 1993 the biology of the southern ocean has been referred to as international research at its best and an invaluable reference drawing on the considerable volume of information published in the last ten years this second edition retains the format that made the first edition a popular bestseller while updating the information with the latest research results available the book begins with a description of the physico chemical environment and in a logical sequence covers phytoplankton and primary production the sea ice microbial communities and the secondary consumers the zooplankton the author includes an extended chapter on the biology and ecology of antarctic krill that highlights its central position in the southern ocean food web a series of chapters consider the higher consumers nekton with an emphasis on cephalopods fish seals whales and seabirds the following chapters explore selected ecosystem components the benthic communities life beneath the fast ice and ice shelves recent advances in understanding decomposition processes and the role of bacteria and protozoa the author synthesizes ecosystem dynamics with an emphasis on the pelagic ecosystem he covers resource exploitation the impact of such exploitation on the marine ecosystem and the problems involved in the management of the living resources his epilogue summarizes the extent to which our understanding of the functioning of the antarctic marine ecosystem has changed in the last 50 years for example there has been a dramatic change in our view of krill and its role in the southern ocean marine ecosystem the book concludes with the statement that research carried out under the agcs programme and the scientific committee on antarctic research scar will continue to provide critical information on the functioning of antarctic marine ecosystems intended for all those with an ongoing interest in antarctic research conservation and management this volume represents one of the most authoritative resources in the field as it covers all aspects of this important marine ecosystem

1988

convicted sex offenders released from custody at the end of their criminal sentences pose a risk for re offense in many us states sexually violent predator svp laws have been enacted that allow for the post prison preventive detention of high risk sex offenders svp laws require the courts to make dispositions that protect the public from harm while at the same time respecting the civil rights of the offender this book describes these svp laws their constitutionality and aspects of their operation courts hear expert risk testimony based heavily on the results of actuarial risk assessment problems associated with this testimony include the lack of a theory of recidivism risk bias due to human decision making and the insularity of scholarship and practice along developmental lines the authors propose changes in legal standards as well as a unified developmental model that treats sexual violence as an evolving condition with roots traceable to childhood and paths that extend into adolescence and adulthood

Basic Concepts Of Hemostasis

2019-06-04

metabolic inhibitors and receptor antagonists are indispensable tools for the molecular life scientist by blocking specific enzymes or receptor mediated signal transduction cascades they simplify the analysis of complex cellular processes especially when it is essential to demonstrate that a process of interest is functionally linked to a particular enzyme or receptor from antibiotics to statins modern medicine relies on the reliability and ease of use of enzyme and receptor directed inhibitors and antagonists the inhibitor index is a comprehensive curated compendium of over 7 800 enzyme inhibitors and receptor antagonists including many toxins poisons and metabolic uncouplers
