javascript html dom w3schools Dec 23 2023

What is the HTML DOM? The HTML DOM is a standard object model and programming interface for HTML. It defines the HTML elements as objects, the properties of all HTML elements, the methods to access all HTML elements, the events for all HTML elements, in other words, the HTML DOM is a standard for how to get, change, add, or delete.

object model wikipedia Nov 22 2023

Object model in computing: Object model has two related but distinct meanings: the properties of objects in general in a specific computer programming language technology notation or methodology that uses them. Examples are the object models of Java, the component object model (COM) or object modeling technique (OMT).
