overnight the series of uprisings that began in 2010 profoundly altered politics in the region forcing many experts to drastically revise their understandings of the arab people yet while the arab uprisings have indeed triggered seismic changes arab public opinion has been a perennial but long ignored force influencing events in the middle east in the world through arab eyes eminent political scientist shibley telhami draws upon a decade s worth of original polling data probing the depths of the arab psyche to analyze the driving forces and emotions of the arab uprisings and the next phase of arab politics with great insight into the people and countries he has surveyed telhami provides a longitudinal account of arab identity revealing how arabs present day priorities and grievances have been gestating for decades the demand for dignity foremost in the chants of millions went far beyond a straightforward struggle for food and individual rights the arabs cries were not simply a response to corrupt leaders but were in fact inseparable from the collective respect they crave from the outside world decades of perceived humiliations at the hands of the west have left many arabs with a wounded sense of national pride but also a desire for political systems with elements of western democracies an apparent contradiction that is only one of many complicating our understanding of the monumental shifts in arab politics and society in astonishing detail and with great humanity telhami identifies the key prisms through which arabs view issues central to their everyday lives from democracy to religion to foreign relations with iran israel the united states and other world powers the world through arab eyes reveals the hearts and minds of a people often misunderstood but ever more central to our globalized world

the uprisings that transformed the middle east beginning in 2011
have left experts scrambling to understand where the region is
likely to go in years to come but missing from most of the analysis
is a longer view of the evolution of arab public opinion and
identity and how this is likely to influence this fast changing
region in the world through arab eyes shibley telhami shows how
the roots of these rebellions stretch back decades and explains
how they will continue to affect the stability of the middle east in
the years to come telhami draws on a decade s worth of polling
data and analysis to provide a comprehensive look at this

The Crusades Through Arab Eyes

european and arab versions of the crusades have little in common
for arabs the twelfth and thirteenth centuries were years of
strenuous efforts to repel a brutal and destructive invasion by
barbarian hordes under saladin an unstoppable muslim army
inspired by prophets and poets finally succeeded in destroying
the most powerful crusader kingdoms the memory of this greatest
and most enduring victory ever won by a non european society
against the west still lives in the minds of millions of arabs today
amin maalouf has sifted through the works of a score of
contemporary arab chroniclers of the crusades eyewitnesses and
often participants in the events he retells their stories in their
own vivacious style giving us a vivid portrait of a society rent by
internal conflicts and shaken by a traumatic encounter with an
alien culture he retraces two critical centuries of middle eastern
history and offers fascinating insights into some of the forces that
shape arab and islamic consciousness today well researched and
highly readable guardian a useful and important analysis adding
much to existing western histories worth recommending to

story very readable warmly recommended times literary

it is taken for granted even among many washington
policymakers that islam is a fundamentally peaceful religion and
that islamic jihad terrorism is something relatively new a product
of the economic and political ferment of the twentieth century but
in the history of jihad from muhammad to isis islamic scholar

fought for another 700 years to get the jihadi invaders out of the

not long ago bernard lewis wrote his islam and the west telling us about the history of these cultures as a history of military conflict one more famous book takes that approach to take a look at the recent development in world politics and predict its clash of civilizations huntington shows the post cold war world by explaining global politics along cultural lines one of the most important of these lines is not surprisingly the one between the islamic and the western civilizations but what if we take a closer look on what appears to be behind the ambiguous history of crusades and holy wars are there perhaps more sophisticated explanations we have to differentiate the motives for the main campaigns in an assumed continuous conflict therefore we will see over the crusades the fierce war at the front between christendom and islam under ottoman rule and finally the modern antagonisms to verify or falsify that theory of a causally determined cultural conflict

this book explores the foundations of the isis is terror organization whose violent and stunning victories have galvanized the world it seeks to not only tell the story of its history but perhaps most importantly explain its funding leadership motivations and ultimate goals and vision through an intelligent and thoughtful perspective that examines where western leadership went wrong and the often cynical calculations that have been made ironically many of those decisions not only damaged relations with the arab world but as perceptive readers are sure to discover policies that damaged their home countries as well it also critically examines middle eastern history through arab eyes in its relations with the west making the case that understanding our rivals is a testament to strength not weakness constant references and comparisons are made to past historical events so that readers are continually reminded the importance of learning from history and its evolving characteristics the book concludes with thoughtful recommendations on how the west should respond to the turmoil in the middle east along with the prospects for the most probable outcomes
