bioethics emerged at a time when infectious diseases were not a major concern thus bioethics never had to develop a normative framework sensitive to situations of disease transmission the patient as victim and vector explores how traditional and new issues in clinical medicine research public health and health policy might look different in infectious disease were treated as central the authors argue that both practice and policy must recognize that a patient with a communicable infectious disease is not only a victim of that disease but also a potential vector someone who may transmit an illness that will sicken or kill others bioethics has failed to see one part of this duality they document and public health the other that the patient is both victim and vector at one and the same time the patient as victim and vector is jointly written by four authors at the university of utah with

togy is pleased to present the oil gas year trinidad and tobago 2019 published in partnership with the ministry of energy and energy industries and the energy chamber of trinidad and tobago the oil gas year trinidad and tobago 2019 analyses this changing landscape and the approaches the country can take to maintain its competitive edge in the mid to long term including the development of niquan energy s gtl plant and the establishment of the island nation as a logistics and training hub for guyana s burgeoning oil and gas industry this fifth edition covers efforts to resolve continued gas curtailments via cross border deals and negotiations with grenada venezuela and guyana as well as through renegotiated contracts between producers and the national gas company of trinidad and tobago and new gas production from super major bp and local player denovo energy the book also showcases the expansion of the main ports at point lisas and galeota noc petrotrin s challenges and subsequent restructuring and the domestic epc landscape with gas coming on line from the startup of new developments throughout 2018 gas production has begun to rise steadily back up to previous

levels more gas is expected to come from offshore areas such as acreage currently being explored by bhp group trinidad and tobago is awaiting the march 2019 start of commercial production at caribbean gas chemical s complex which will increase the country s competitiveness against other methanol producers in the western hemisphere however slowed gas production and feedstock supplies could potentially see the island nation pushed out of its position as the world s top methanol producer the caribbean energy landscape is also shifting with countries such as grenada the bahamas jamaica and most notably guyana delving deeper into their own oil and gas activities looking to offset production gaps resulting from the current instability of regional heavyweight venezuela extensive in depth analysis is supported by comprehensive maps illustrations and graphs to create a market guide essential for players seeking to either expand their operations in or enter the trinidadian market
