this is a reprint of anthony ogus classic study of regulation first published in the 1990s it examines how since the last decades of the twentieth century there have been fundamental changes in the relationship between the state and industry with the aid of economic theory anthony ogus critically examines the ways in which public law has been adapted to the task of regulating industrial activity and provides a systematic overview of the theory and forms of social and economic regulation in particular he explores the reasons why governments regulate for which broadly speaking two theoretical frameworks exist first public interest theories determine that regulation should aim to improve social and economic welfare second economic theories suggest that regulation should aim to satisfy the demands of private interests the book also looks at the evolution of the forms of regulation in britain extending to the policies of privatization and deregulation which were so characteristic of the period the author skilfully evaluates the advantages and disadvantages of the different forms of regulation particularly in the light of the two theoretical frameworks but also by involving an analysis of how firms respond to the various kinds of incentives and controls offered by government a significant feature of the book is its analysis of the choices made by

governments between the different forms of regulation and the influence exerted by interest groups including bureaucrats and ec law

in this new edition paul cartledge and antony spawforth have taken account of recent finds and scholarship to revise and update their authoritative overview of later spartan history and of the social political economic and cultural changes in the spartan community this original and compelling account is especially significant in challenging the conventional misperception of spartan decline after the loss of her status as a great power on the battlefield in 371 bc the book's focus on a frequently overlooked period makes it important not only for those interested specifically in sparta but also for all those concerned with hellenistic greece and with the life of greece and other greek speaking provinces under non roman rule

all over the world the statues of mary are miraculously crying in the meantime a journalist in washington d c is diverted away from her own personal demons when she takes it upon herself to question why the vatican is not declaring these occurrences as miracles after witnessing the unexplainable phenomena herself the journalist suspects her nightly barrage of haunting nightmares about the violent murders of countless women from five thousand year old priestesses to women accused of being witches in the seventeenth century may have something to do with the answer as she investigates the biggest story of her life women all over the world in the 21st century are feeling the awakening as the discovery of ancient artifacts are

disproving the beliefs set forth by patriarchal religions for thousands of years when the journalist receives a visitation from a beautiful goddess who at first appears to be the virgin mary she suddenly realizes that an ancient religious and political cover up has grossly distorted some very important historical truths as the journalist investigates and begins to publicly write about what she has uncovered death threats and terror follow next as powerful members of the world s patriarchal religions and the age old male run organizations that support them fight viciously to keep one of the world s oldest and most deceptive societal form of control against women hidden from the world but as intimidation and threats increase so too do the miracles and visitations from the real sleeping goddess as she awakens once again to bless and protect the world while igniting the hearts and souls of oppressed women everywhere

the study of funeral monuments is a growing field but monuments erected to commemorate children have so far received little attention whilst the practice of erecting monuments to the dead was widespread across renaissance europe the vast majority of these commemorated adults with children generally only appearing as part of their parents memorials however as this study reveals in poland there developed a very different tradition of funerary monuments designed for and dedicated to individual children daughters as well as sons the book consists of five major parts which could be read in any order though the

overall sequencing is based on the premise that an understanding of the context and background will enhance a reading of these fascinating child monuments consequently there is a progression of knowledge presented from the broader context of the earlier parts towards the final parts where the actual child monuments are discussed in detail thus the book begins with an overview of the wider cultural contexts of funerary monuments and where children fitted into this it then moves on to to look at the forgotten renaissance of central europe and specifically the situation in poland the middle part addresses the culture of memory examining the role of funerary monuments in reinforcing social religious and familial continuity the last parts deal with the physical monuments empirical data iconography and iconology through this illuminating consideration of children s monuments the book raises a host of fascinating questions relating to polish social and cultural life family structure attitudes to children and gender it also addresses the issue of why poland witnessed this unusual development and what this tells us about the transmission of cultural and artistic ideas across renaissance europe drawing upon social and cultural history visual and gender studies the work not only asks important new questions but provides a fresh perspective on some familiar topics and themes within renaissance history
