About Philosophy: Pearson New International Edition

2014

the world interweaves two stories of our interactions with nature and with each other the environment centered story is about humans distancing themselves from the rest of nature and searching for a relationship that strikes a balance between constructive and destructive exploitation the culture centered story is of how human cultures have become mutually influential and yet mutually differentiating both stories have been going on for thousands of years we do not know whether they will end in triumph or disaster there is no prospect of covering all of world history in one book rather the fabric of this book is woven from selected strands readers will see these at every turn twisted together into yarn stretched into stories human focused historical ecology the environmental theme

precalculus fifth edition by Lial, Hornsby, Schneider, and Daniels engages and supports students in the learning process by developing both the conceptual understanding and the analytical skills necessary for success in mathematics. With the fifth edition, the authors recognize that students are learning in new ways and that the classroom is evolving. The Lial team is now offering a new suite of resources to support today's instructors and students. New co-author Callie Daniels has experience in all classroom types, including traditional, hybrid, and online courses, which has driven the new MyMathLab features. For example, MyNotes provide structure for student note-taking, and interactive chapter summaries allow students to quiz themselves in interactive examples on key vocabulary, symbols, and concepts. Daniels' experience, coupled with the long-time successful approach of the Lial series, has helped to more tightly integrate the text with online learning than ever before.
