Treasury of Human Inheritance:

1909

this work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it this work was reproduced from the original artifact and remains as true to the original work as possible therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work this work is in the public domain in the united states of america and possibly other nations within the united states you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work as a reproduction of a historical artifact this work may contain missing or blurred pages poor pictures errant marks etc scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public we appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant

Treasury of Human Inheritance: Anomalies and diseases of the eye

1933

excerpt from treasury of human inheritance vol 1 for a publication of this kind to be successful at the present time it should as i have indicated above be entirely free from controversial matter the treasury of human inheritance therefore contains no reference to theoretical opinions it gives in a standardised form the pedigree of each stock this is accompanied by a few pages of text describing the individual members of the stock giving references to authorities and if the material has been published to the locus of original publication when necessary the characteristic is illustrated by photography or radiography in this way it is hoped in the course of a few years to place a large mass of material in the hands of the student of human heredity it will not cut him off from but directly guide him to original and fuller sources of information further the treasury will provide students of eugenics and of sociology medical men and others with an organ where their investigations can find ready publication and where as time goes on a higher and more complete standard of family history than has hitherto been usual can be maintained each pedigree and its description appears under the name of the author responsible for its completeness and accuracy and by aid of a key number to a confidential manuscript register of names and localities it is hoped that it may be occasionally possible for future investigators to recover traces of individual stocks or to ascertain whether newly discovered cases can be linked on to previously recorded families no one who has attempted a collection of this kind drawn from many quarters and prepared by different writers will be over severe on discrepancies and omissions in the earlier issues the full work of standardisation can only be carried out as the diverse needs of different types of family characters are better appreciated it is not always possible to maintain a proper balance between the graphic and verbal descriptions but i wish most strongly to insist on the point that neither are to be interpreted alone they are component parts of one whole and the reader who draws conclusions from the engraved pedigrees without consulting the verbal accounts is certain to be led into error presence or absence of a character cannot be settled by the simple blacking or omitting to black a circle the description is practically that of the original observer whereas the pedigree is the work of the author of the special section of the treasury and he may under or over estimate the statement presented to him as general editor i feel sure that much care has been taken to reach an unbiassed judgment and i know that contributors and members of this laboratory have spent many days of labour in following up both original pedigrees and pedigrees in dissertations books and journals very hard indeed of access about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
