medicine is an ancient profession that advances as each generation of practitioners passes it down it remains a distinguished flawed and rewarding vocation but it may be coming to an end as we know it computer algorithms promise patients better access safer therapies and more predictable outcomes technology reduces costs

helps design more effective and personalized treatments and diminishes fraud and waste balanced against these developments is the risk that medical professionals will forget that their primary responsibility is to their patients not to a template of care written for anyone who has considered a career in health care and for any patient who has had an office visit where a provider spent more time with data entry than with them this book weighs the benefits of emerging technologies against the limitations of traditional systems to envision a future where both doctors and patients are better informed consumers of health care tools

while not traditionally named as a virtue accountability plays a vital part in healthy relationships and in a morally integrated life the idea that one is answerable to others besides oneself to give others what they are due places relational accountability within a frame of justice and serves to counterbalance the prevalent emphasis on autonomy in mental health and human flourishing welcoming responsibility to and caring about one's impact on others is basic to making personal relationships work over time without accountability resentment and withdrawal from relationships would ensue accountability is also critical to the trust and cooperation needed for effective work with others moreover accountability serves as a critical support to the integrity and wholeness of the morally virtuous person actively knowing to whom and for what one is accountable is clarifying in terms of connecting one's relational responsibilities with one's identity direction and sense of purpose

discover effective outcome oriented ways to help cfs patients who have endured useless or inappropriate treatments from the author for many years i have viewed brain function as a system of electrochemical impulses continually flashing through the brain these neural networks can often be modulated fairly simply by tuning them the point i have been trying to make for many years is that this process may be pharmacologically regulated extremely rapidly in a manner which does not yet seem to be recognized by the medical profession in this remarkable volume dr jay a goldstein clearly presents both the theoretical and the practical aspects of his revolutionary approach to treating cfs and other conditions that have often been termed psychosomatic dr goldstein author of chronic fatigue syndromes the limbic hypothesis and betrayal by the brain the neurologic basis of chronic fatigue syndrome fibromyalgia syndrome and related neural network disorders shows how he achieves results for patients with cfs and a variety of other syndromes in days rather than months or years this well referenced book answers questions from the most

basic to the most complex including what is neurosomatic medicine how did dr goldstein come to pioneer and practice this specialty what abnormalities in brain function produce neurosomatic disorders how can an understanding of these abnormalities help you provide effective treatment why do these treatments sometimes work so rapidly what is receptor profiling and how does it indicate the type of receptor dysregulation in an individual patient in part i inventing neurosomatic medicine dr goldstein describes the remarkable how and why of his life and his development of this new field of medicine including his clashes with the medical psychoanalytic establishment one of the greatest medical innovators of the modern era dr goldstein has seen over 20 000 cfs patients and has experienced most of the pitfalls that having such a large number of patients entails he shares his insight on legal issues such as how to deal with the law and court systems how to best provide expert testimony and how to defend against spurious legal actions in addition dr goldstein describes how he learned to work effectively outside of the managed care system in part ii society for neuroscience conference proceedings the author shares his expertise to bring you experimental results and pearls of wisdom relating to neurosomatic medicine from the 28th and 29th annual meetings of the society for neuroscience the largest and most important neuroscience conference in the world dr goldstein sorted through thousands of experiments presented at the conferences to bring you the most relevant findings part iii pathophysiology and treatment is essential reading for anyone planning to practice neurosomatic medicine in this section richly illustrated with over 70 pages of color figures and diagrams that make complicated concepts clear dr goldstein shares his knowledge about dozens of the agents he uses to help cfs sufferers and others manage their pain fatigue and other symptoms this is information that simply cannot be found anywhere else and will prove invaluable to all fledgling neurosomatic practitioners this one of a kind volume is thoughtfully put together from the extensive list of abbreviations near the beginning to the exhaustive references and an appendix with diagnostic criteria a treatment algorithm a medication list of treatment options available now or in the near future and a checklist of cfs symptoms
