Blockchain and DLT 1995 geomaterials constitutive equations and modelling is a revised english language version of the successful french book manuel de rheologie des geomateriaux published in 1987 with contributors from international experts in the field covers the behaviour of non metallic materials used in civil engineering

451 2014-04-20 in 1714 the 29 year old johann sebastian bach was promoted to the position of concertmaster at the ducal court of weimar this post required him for the first time in his already established career to produce a regular stream of church cantatas one cantata every four weeks among the most significant works of this period is ich hatte viel bekümmernis in meinem herzen cantata 21 generally known in english as i had much affliction cantata 21 draws from several psalms and the book of revelations and offers a depiction of the spiritual ascent of the soul from intense tribulation to joy and exaltation although widely performed and loved by musicians cantata 21 has endured much criticism from scholars and critics who claim that the piece lacks organizational clarity and stylistic coherence in tears into wine renowned bach scholar eric chafe challenges the scholarly consensus arguing that cantata 21 is an exceptionally carefully designed work and that it displays a convergence of musical structure and theological purpose that is paradigmatic of bach s sacred work as a whole drawing on a wide range of lutheran theological writing chafe shows that cantata 21 reaches beyond the scope of the individual liturgical occasion to voice a breadth of meaning that encompasses much of the core of lutheran thought chafe artfully demonstrates that instead of simply presenting a musical depiction of the soul s journey from sorrow to bliss cantata 21 expresses the various stages of god s revelation and their impact on the believing soul as a result chafe reveals that cantata 21 has a formal design that mirrors lutheran belief in unfolding revelation with the final movement representing the work s crown the goal toward which all of the earlier movements are directed complete with full text translations of the cantata and the liturgical readings that would have accompanied it at the first performance tears into wine is a monumental book that is ideally suited for bach scholars and students as well as those generally interested in the relationship between theology and music

Invisible Cathedrals 1990 why do shakespeare and the english bible seem to have an inherent relationship with each other how have these two monumental traditions in the history of the book functioned as mutually reinforcing sources of cultural authority how do material books and related reading practices serve as specific sites of intersection between these two textual traditions this collection makes a significant intervention in our understanding of shakespeare the bible and the role of textual materiality in the construction of cultural authority departing from conventional source study it questions the often naturalized links between the shakespearean and biblical corpora examining instead the historically contingent ways these links have been forged the volume brings together leading scholars in shakespeare book history and the bible as literature whose essays converge

on the question of scripture as source versus scripture as process whether that scripture is biblical or shakespearean and in turn explore themes such as cultural authority pedagogy secularism textual scholarship and the materiality of texts covering an historical span from shakespeare s post reformation era to present day northern ireland the volume uncovers how shakespeare and the bible s intertwined histories illuminate the enduring tensions between materiality and transcendence in the history of the book

Problem Solving in Theoretical Physics 2016-02 in philosophies of gratitude ashraf h a rushdy explores gratitude as a philosophical concept the first half of the book traces its significance in fundamental western moral philosophy and notions of ethics specifically examining key historical moments and figures in classical antiquity the early modern era and the enlightenment in the second half of the book rushdy focuses on contemporary meanings of gratitude as a sentiment action and disposition how we feel grateful act grateful and cultivate grateful being he identifies these three forms of gratitude to discern various roles our emotions play in our ethical responses to the world around us rushdy then discusses how ingratitude instead of indicating a moral failure can also act as an important principle and ethical stand against injustice rushdy asserts that if we practice gratitude as a moral recognition of the other then that gratitude varies alongside the different kinds of benefactors who receive it ranging from the person who provides an expected service or gift to the divine or natural sources whom we may credit with our very existence by arguing for the necessity of analyzing gratitude as a philosophical concept rushdy reminds us of our capacity and appreciation for gratitude simply as an acknowledgment and acceptance of our humble dependency on and connectedness with our families friends communities environments and universe

Geomaterials: Constitutive Equations and Modelling 2015-04-01 in a radically new interpretation and synthesis of highly popular 18th and 19th century genres michelle burnham examines the literature of captivity and using homi bhabha s concept of interstitiality as a base provides a valuable redescription of the ambivalent origins of the us national narrative stories of colonial captives sentimental heroines or fugitive slaves embody a binary division between captive and captor that is based on cultural national or racial difference but they also transcend these pre existing antagonistic dichotomies by creating a new social space and herein lies their emotional power beginning from a simple question on why captivity particularly that of women so often inspires a sentimental response burnham examines how these narratives elicit both sympathy and pleasure the texts carry such great emotional impact precisely because they traverse those very cultural national and racial boundaries that they seem so indelibly to inscribe captivity literature like its heroines constantly negotiates zones of contact and crossing those borders reveals new cultural paradigms to the captive and ultimately the reader
