 information for parents and teachers about how to help learning disabled and gifted
 children from their beginnings campuses emerged as hotbeds of traditions and
 folklore american college students inhabit a culture with its own slang stories humor
 beliefs rituals and pranks simon j bronner takes a long engaging look at american
 campus life and how it is shaped by students and at the same time shapes the values
 of all who pass through it the archetypes of absent minded profs fumbling jocks and
 curve setting dweebs are the stuff of legend and humor along with the all nighters
 tailgating parties and initiations that mark campus tradition and student identities
 undergraduates in their hallowed halls embrace distinctive traditions because the
 experience of higher education precariously spans childhood and adulthood parental
 and societal authority home and corporation play and work bronner traces historical
 changes in these traditions the predominant context has shifted from what he calls
 the old time college small in size and strong in its sense of community to mass society
 s mega university a behemoth that extends beyond any campus to multiple branches
 and offshoots throughout a state region and sometimes the globe one might assume
 that the mega university has dissolved collegiate traditions and displaced the old time
 college but bronner finds the opposite student needs for social belonging in large
 universities and a fear of losing personal control have given rise to distinctive forms
 of lore and a striving for retaining the pastoral campus feel of the old time college the
 folkloric material students spout and sprout in response to these needs is varied but it
 is tied together by its invocation of tradition and social purpose beneath the veil of
 play students work through tough issues of their age and environment they use their
 lore to suggest ramifications if not resolution of these issues for themselves and for
 their institutions in the process campus traditions are keys to the development of
 american culture from the beginning of the sound era until the end of the 1930s
 independent movie making thrived many of the independent studios were
 headquartered in a section of hollywood called poverty row here the independents
 made movies on the cheap usually at rented facilities where shooting was limited to
 only a few days from allied pictures corporation to willis kent production 55 poverty
 row studios are given histories in this book some of the studios such as diversion
 pictures and crescent pictures came into existence for the sole purpose of releasing
 movies by established stars others for example j d kendis were early exploitation
 filmmakers under the guise of sex education the histories include critical commentary
 on the studio s output and a filmography of all titles released from 1929 through 1940
