The European Heritage

2017-07-06

gerard delanty offers a critical interpretation of the european heritage today in light of recent developments in the human and social sciences and in view of a mood of crisis in europe that compels us to re think the european past one of the main insights informing this book is that a transnational and global perspective on european history can reorient the european heritage in a direction that offers a

more viable way for contemporary europe to articulate an intercultural identity in keeping with the emerging shape of europe and with its own often acknowledged past he argues that the european heritage is based less on a universalistic conception of culture than on a plurality of interconnecting narratives such a perspective opens up new directions for scholarship and public debate on heritage that are guided by critical cosmopolitan considerations that highlight contention resistances competition and dissonance he argues that the specificity of the european dimension of culture is in the entanglement of many cultures rather than in an original culture the cultures of europe are not separated but have been shaped in close interaction with each other and with the non european world nations are not therefore unique exceptional or fundamentally different from each other the outcome of such intermingling is a multiplicity of ideas of europe that serve as shared cultural reference points

Freedom's Progress?

2021-10-04

in freedom s progress gerard casey argues that the progress of freedom has largely consisted in an intermittent and imperfect transition from tribalism to individualism from the primacy of the collective to the fragile centrality of the individual person and of freedom such a transition is he argues neither automatic nor complete nor are relapses to tribalism impossible the reason for the fragility of freedom is simple the importance of individual freedom is simply not obvious to everyone most people want security in this world not liberty libertarians writes max eastman used to tell us that the love of freedom is the strongest of political motives but recent events have taught us the extravagance of this opinion the herd instinct and the yearning for paternal authority are often as strong indeed the tendency of men to gang up under a leader and submit to his will is of all political traits the best attested by history the charm of the collective exercises a perennial magnetic attraction for the human spirit in the 20th century fascism bolshevism and national socialism were casey argues each of them a return to tribalism in one form or another and many aspects of our current western welfare states continue to embody tribalist impulses thinkers you would expect to feature in a history of political thought feature in this book plato aristotle machiavelli locke mill and marx but you will also find thinkers treated in freedom s progress who don t usually show up in standard accounts johannes althusius immanuel kant william godwin max stirner joseph proudhon mikhail bakunin pyotr kropotkin josiah warren benjamin tucker and aueron herbert freedom s progress also contains discussions of the broader social and cultural contexts in which politics takes its place with chapters on slavery christianity the universities cities feudalism law kingship the reformation the english revolution and what casey calls twentieth century tribalisms bolshevism fascism and national socialism and an extensive chapter on human prehistory

The Kurdish Question: Identity, Representation and the Struggle for Self-Determination

2015-07-15

The book examines several models which have been advocated for a workable and acceptable solution to the Kurdish problem which would be absolutely necessary for stability in the West Asian region. The book evaluates how the more than two decade long experience of Kurdish self-rule in a democratic framework in Iraqi Kurdistan affects the debate over the other Kurdish regions in West Asia with Turkey's European Union accession process contributing to the opening of the political space to ethno-nationalism. There is a need for a non-military solution to the Kurdish issue. The book analyses the role of the Kurdish diaspora which plays a significant part in placing the Kurdish question on the European political agenda. It also examines the role of the Kurds in the aftermath of the Arab Spring and the changing geopolitics in the region. Now the Kurds maintain the strongest platform in battling against the ISIS terrorists.

The Peacekeeping Failure in South Sudan

2022-08-11

In 2011 South Sudan was welcomed into the United Nations as the world's newest nation. Celebrations on the ground reflected palpable relief after more than 20 years of violent struggle with unprecedented goodwill and optimism. The UN deployed 7,000 soldiers and another 2,000 police and civilian peacekeepers to the country to support its transition to independence. However, the mission failed and within less than three years South Sudan was plunged into a catastrophic civil war. Using firsthand accounts from senior UN officials and referencing hitherto unseen UN documents, this book explores the role of the peacekeeping mission in that failure. It challenges the resignation with which many in academia and the media greeted the underperformance of the peacekeepers. It suggests that even while under-resourced they could have done much more to prevent bloodshed in the new country and protect civilians from the chaos of the first years of the conflict. The UN has thus far avoided a thorough and public examination of its actions in South Sudan. It has avoided accountability and instead rewarded failed decision-makers. This book is an attempt to re-assess the legacy of that mission and to detail how its many mistakes can and should be avoided in the future.

Shot on Location

2016-02-18

In the early days of filmmaking, before many of Hollywood's elaborate sets and soundstages had been built, it was common for movies to be shot on location. Decades later, Hollywood filmmakers rediscovered the practice of using real locations and documentary footage in their narrative features. Why did this happen? What caused this sudden change? Renowned film scholar R. Barton Palmer answers this question in *Shot on Location* by exploring the historical, ideological, economic and technological developments that led Hollywood to head back outside in order to capture footage of real places. His groundbreaking research reveals that wartime newsreels had a massive influence on postwar Hollywood film. Although there are key distinctions to be made between these movies and their closest contemporaries, Italian Neorealist films, considering how these practices were used in everything from war movies like *Twelve O'Clock High* to westerns like *The Searchers*, Palmer explores how the blurring of the formal boundaries between cinematic journalism and fiction lent a reality effect to otherwise implausible stories. *Shot on Location* describes how the period's greatest directors, from Alfred Hitchcock to Billy Wilder, increasingly moved beyond the confines of the studio. At the same time, the book acknowledges the collaborative nature of moviemaking, identifying key roles that screenwriters art

designers location scouts and editors played in incorporating actual geographical locales and social milieus within a fictional framework palmer thus offers a fascinating behind the scenes look at how hollywood transformed the way we view real spaces

Hamas, Popular Support and War in the Middle East

2016-02-05

this book offers a new understanding of the nature of power seeking insurgent groups by empirically examining the use of violence by hamas in the palestinian israeli conflict though hamas has learned to ride the tides of popular support it remains suspended between its quest to achieve the values of its ardent supporters reclamation of land through force and the desire to grow popular support this tension is reflected in how and when the group exercises violent resistance the theoretical framework applied in this volume provides a simple construct to understand the dynamics that result in use and non use of violence under changing environmental conditions by hamas but could be applied more broadly to other power seeking insurgent groups including isil the book weaves together the dynamics between violent actions and internal and external influences on hamas including expressed values of the group palestinian popular support measures leaders personalities and innovation weapons and tactics israeli influence and targeted killings peace processes and conflicts in gaza syria iraq and egypt with newly assembled datasets on hamas violent acts and public statements israeli targeted killings historical measures of popular support and extensive field interviews the book offers a fresh perspective on insurgent group violence by demonstrating under what conditions the group exercises violence or refrains from doing so this book will be of much interest to both policy makers and students of the arab israeli conflict political violence middle eastern politics security studies and international relations in general

What's Left Now?

2018-02-02

our sense of history shapes how we think about ourselves one of the distinguishing features of the left in Britain is that it holds to a remorselessly bleak and miserabilist view of our recent political history one in which Margaret Thatcher's election in 1979 marked the start of a still continuing fall from political grace made evident by the triumph of a free market get what you can neoliberal ideology dizzying levels of inequality social decay rampant individualism state authoritarianism and political corruption the left does not like what has happened to us and it does not like what we have become Andrew Hindmoor argues that this history is wrong and self-harming it is wrong because Britain has in many respects become a more politically attractive and progressive country over the last few decades it is self-harming because this bleak history undermines faith in politics post-Brexit post Grenfell and post the 2010 2015 and 2017 general elections things may not right now look that great but looked at over the longer haul Britain is a long way from being a posterchild for neoliberalism left-wing ideas and arguments have shaped and continue to shape our politics
