tradition of robert kaplan s the revenge of geography for centuries oceans were the chessboard on which  
empires battled for supremacy but in the nuclear age air power and missile systems dominated our worries about  
security and for the united states the economy was largely driven by domestic production with trucking and  
railways that crisscrossed the continent serving as the primary modes of commercial transit all that has changed  
as nine tenths of global commerce and the bulk of energy trade is today linked to sea based flows a brightly  
painted forty foot steel shipping container loaded in asia with twenty tons of goods may arrive literally anywhere  
else in the world how that really happens and who actually profits from it show that the struggle for power on the

voyage through the great modern ports and naval bases from the vast container ports of hong kong and  
shanghai to the vital naval base of the american seventh fleet in hawaii to the sophisticated security  
arrangements in the port of new york along the way the book illustrates how global commerce works that we are  
amidst a global naval arms race and why the oceans are so crucial to america s standing going forward as jones  
reveals the three great geopolitical struggles of our time for military power for economic dominance and over our

this who will rule the waves and set the terms of the world to come

the term middle power is conceptually fragile some scholars have even argued for abandoning it this book argues that the concept needs to be analysed more profoundly and that new analytical tools need to be developed to better understand the phenomenon the traditional approach based on western states is insufficient and has become increasingly irrelevant in a transformed global environment instead of drawing from a single theory of international relations the contributors have chosen to build upon a wide range of theories in a deliberate demonstration of analytic eclecticism a pluralistic approach provides stronger explanations while remaining analytically and intellectually rigorous many of the theory contributions are reconsidering how the largely western bases of such theorising need revising in light of the emerging middle powers many of which are

lion city narratives singapore through western eyes fulfils four aims first it is a study of subjective western impressions of singapore s 145 years 1819 1963 of colonial history the study is not meant to be an in depth historical analysis of singapore but rather to give the reader an impressionistic account of how western residents viewed singapore over the decades second this study could be seen as a short biography of singapore s evolution as a city the chapters on the imageability of singapore and its urban morphology provide a holistic perspective of singapore s urban dynamics third this book provides a cultural insight into singapore s population both white residents and transient visitors as well as the locals or asians fourth it opens a window into singapore s development at a time when the west was at its cultural zenith and when great britain was the principal superpower of the 19th century hence singapore carried twin colonial legacies it was the archetype trading emporium between east and west and it became for the british the major point d appui for defence finally the singapore colonial narrative is set in a broader academic discourse that allows the reader to see a wider picture of singapore s colonial development the book does not attempt to make a definitive statement about the western involvement in singapore it deals more with an association of many subjective western perspectives that add colour to the liveability of the tropics perceptions of the exotic orient and the myriad views of ethnic groups without the western writings paintings and maps academia would have minimal records of singapore s development as a new colony in the early 19th century however singapore s growth has been extremely well documented this book will appeal to singaporeans interested in understanding singapore s colonial past westerners interested in the western cultural persona in the development of singapore researchers dealing with the urban development of less developed countries and colonial development in the tropical world and lastly academics who are interested in singapore and the region s political and economic development as a case study
