if not for the reproductive functions of women would there be anything called women s health care a review of medical literature practice and policy in this country would suggest that the answer is no offering a startling view of the current state of health care for women in the united states and laying the foundation for a new widely defined women s medicine man made medicine makes an urgent statement about gender bias in the medical establishment and its pernicious effects on the well being of women and the care they receive these essays by physicians lawyers activists and scholars present a rare interdisciplinary approach to a complex set of issues gender stereotyping and bias in the collection analysis and reporting of scientific data and in the ways health related news is covered by the media are examined the exclusion of women from the health care policy making process and the effect such exclusion has on the determination of priorities among potential areas of research are also explored with discussions of the plight of specific populations of women whose health care needs are not being sufficiently met for example immigrants prisoners the mentally ill or women with hiv aids disabilities or reproductive health problems this book considers matters of race and class within the parameters of gender as it builds a fundamental challenge to the existing health care system a

range of current reform proposals are also evaluated in terms of their potential impact on women suggesting no less than a radical rethinking of women s medicine man made medicine gives essential direction to the discussions that will shape the future of health care in this country it will be of great interest to a wide audience including health care advocates policymakers scholars and readers generally concerned with women s health issues contributors ellen barry laurie beck joan bertin janet calvo wendy chavkin kay dickersin abigail english elizabeth fee carol gill nancy krieger joyce mcconnell judy norsigian ann scales susan stefan lauren schnaper catherine teare extraordinary independent scholar of comparative religion and mythology walker examines a time when the goddess and her consort son ruled supreme and forward into the era when the patriarchy usurped her worship while the government wants you to think that aliens are buzzing military bases this book presents the overwhelming evidence that most nuts and bolts ufos are made on earth and piloted by earthlings this important book reveals the secret technologies german scientists captured at the end of world war ii were working on and takes us right up to today s state of the art flying machines this anthology of essays by a group of distinguished scholars investigates post 1945 city planning in britain not from a technical viewpoint but as a polemical visual and educational phenomenon shifting the focus of scholarly interest towards the often neglected emotional and aesthetic aspects of post war planning each essay is grounded in original archival research and sheds new light on this critical era in the development of modern town planning this collection is a valuable resource for

this book presents a unique feminist approach to sex dolls and sex robots taking a critical look at the academic and business narratives that serve to rationalise them as new forms of pornography porn robots this edited volume provides an urgent women s centred critique the emergence of sex robots is situated within the wider context of the attack on women s rights and the relentless rise of techno pornography as an outgrowth of the industries of prostitution pornography and child sex abuse these objects offer new ways to dehumanise women and girls while support for sex robots is positioned as progressive and emancipatory the contributors in this volume argue they reduce women to consumable parts they explore how law the arts ethics economy politics and culture are interconnected with harmful technological developments

Our Androcentric Culture Or The Man-Made World Illustrated

2020-12-16

the man made world 1911 is a sociological study by american author and feminist charlotte perkins gilman

inspired by her work as a social reformer and advocate for women's suffrage Gilman sought to write a work of nonfiction that explained the effects of patriarchy not only on the lives of women but on the structure and health of society at large. In the beginning Gilman observes that though biology naturally attributes motherhood and fatherhood to women and men respectively, there is no evolutionary explanation for the widespread control of men over all other human activities. This inequity Gilman explains is what she means by the term androcentric culture: a culture organized by men for men. Having established her thesis, Gilman dedicates chapters to such topics as the family, health, art, sports, religion, education, government, economics, and warfare in order to observe the impact of male domination on each. Ultimately, Gilman asks, what if anything will men lose if women are granted the rights and responsibilities they have no reason not to share? The *Man-Made World* is a thorough and powerful experiment in sociological thought and a groundbreaking work of feminist nonfiction with a beautifully designed cover and professionally typeset manuscript. This edition of Charlotte Perkins Gilman's *The Man-Made World* is a classic of American literature and nonfiction reimagined for modern readers.
