this book children are little mirrors is a compilation of ideas and processes used by over 30 thirty grandmothers there were many saturday night brainstorming sessions with the assistance of a couple of secondary and elementary educators expressing numerous accounts in the classroom i wish that i could take credit for some of these imaginary ideas expressed in this book however i have used these methods raising my own children and others and they work you can put them to practice too there are many influences which effect the development of a child the old folklore that it takes a village to raise a child has a lot of truth to it especially if those villagers can help by injecting positive into that child s growth raising a child can be a pleasant and fun experience yet at times very challenging for both the parent and the child hopefully this book can provided a few inside tips which will help make your parenting adventure both rewarding as well as enjoyable it always helps when you understand why something is happening instead of reacting to a surprise happening for example if you know ahead of time that you have an old worn out fuse in your refrigerator then suddenly all the electricity in your refrigerator goes out no need to panic no need to think horrific thoughts to yell to get upset nor thinking of the cost of buying a new refrigerator because you know that it is the fuse you can relax and think clearly simply replace that fuse and the problem is solved you becoming a wiser parent has already purchased a replacement fuse for this very event when it does fail or go out so you were prepared for the problem and reacted properly hopefully this book will give you some not all advance insights on things and events to watch out for be aware when raising your child so you can be little better prepared and you can react properly remember nothing nothing is more important than the way that you react to it
