in the two thousand years that have elapsed since the time of christ christians have been as much divided by their faith as united as much at odds as in communion and the contents of christian confession have developed with astonishing energy how can believers claim a faith that has been passed down through the ages while recognizing the real historical contingencies that have shaped both their doctrines and their divisions in this carefully argued essay david bentley hart critiques the concept of tradition that has become dominant in christian thought as fundamentally incoherent he puts forth a convincing new explanation of christian tradition one that is obedient to the nature of christianity not only as a revealed creed embodied in historical events but as the apocalyptic revelation of a history that is largely identical with the eternal truth it supposedly discloses hart shows that christian tradition is sustained not simply by its preservation of the past but more essentially by its anticipation of the future he offers a compelling portrayal of a living tradition held together by apocalyptic expectation the promised transformation of all things in god

t s eliot was raised in the unitarian faith of his family in st louis but drifted away from their beliefs while studying philosophy mysticism and anthropology at harvard during a year in paris he became involved with a group of catholic writers and subsequently went through a gradual conversion to catholic christianity many studies of eliot s writings have mentioned his religious beliefs but most have failed to give the topic due weight and many have misunderstood or misrepresented his faith more recently scholars have begun exploring this dimension of eliot s thought more carefully and fully in this book readers will find eliot s anglo catholicism accurately defined and thoughtfully considered essays illuminate the all important influence of the french catholic writers he came to know in paris prominent among them were those who wrote for or were otherwise associated with the nouvelle revue française including andré gide paul claudel and charles louis philippe also active in paris at that time was the notorious charles maurras whose influence on eliot has been exaggerated by those who wished to discredit eliot s traditionalist views a more measured assessment of maurras s influence has been needed and is found in several essays here a wiser french catholic writer jacques maritain has been largely ignored by eliot scholars but his influence is now given due consideration the keynote of eliot s cultural and political writings is his belief that religion and culture are integrally related several contributors examine his ideas on this subject placing them in the context of maritain s ideas as well as those of the catholic historian christopher dawson contributors take account of eliot s intellectual relationship with such figures as john henry newman charles williams and the expert

on church architecture w r lethaby eliot s engagement with other contemporaries who held a variety of christian beliefs including george santayana paul elmer more c s lewis and david jones is also explored this collection presents the subject of eliot s religious beliefs in rich detail from a number of different perspectives giving readers the opportunity to see the topic in its complexity and fullness

theological reflection connecting real life ministry and religious traditions is a core component of most pastoral training it is also a hallmark of practical theology and a common spiritual exercise among ordinary christians trying to discern how their beliefs might influence daily living yet our society is increasingly pluralistic with growing numbers of people from varying belief systems from islam to buddhism as well as an increasing number of atheists in this book edward foley reimagines theological reflection in interfaith contexts and with those of no faith tradition the book addresses and celebrates diverse beliefs and envisions the practice of theological reflection in such contexts theological reflection across religious traditions introduces readers to the basics of traditional forms of theological reflection then considers how it might be reconceived in different contexts from interfaith ministers working together to reduce poverty and homelessness to people of diverse or no faith traditions strategizing to secure the dignity of undocumented immigrants beyond suggestions for collaborative social action the book offers tools for productive interfaith conversation through a process foley calls reflective believing this is a groundbreaking rethinking of theological reflection for today s world proposing that people across the religious landscape can participate in reflective believing for personal and communal benefit without sacrificing their own integrity

theology and the university presents a compelling argument as to why theology still matters it considers how theology has been marginalised in the academy and in public life arguing that doing so has serious repercussions for the integrity of the academic study of religion the chapters in this book demonstrate how theology as the only discipline which represents religion from within provides insight into aspects of religion which are hidden from the social sciences against a backdrop of heated debates on the role of the humanities in the university the book highlights the specific contribution of theological education and research to the work of a university providing essential information for academic and social political decision making whilst the book has an emphasis on the catholic tradition it explores the prospect of fruitful complementarity and interdisciplinarity both with secularised studies of religion and other disciplines in the university such as literature philosophy and the social sciences this book provides orientation for decision makers particularly those concerned with the broader question of humanities in the university students in their choice of study those interested in the wellbeing of today s universities and ecclesial authorities seeking to form leaders capable of intelligent responses to the issues of contemporary society it is a must read for all researchers of theology as well as anyone interested in the role of the humanities more broadly
