this comprehensive introduction to the field represents the best of the published literature on groupware and computer supported cooperative work cscw the papers were chosen for their breadth of coverage of the field their clarity of expression and presentation their excellence in terms of technical innovation or behavioral insight their historical significance and their utility as sources for further reading sourcebook to the field development or purchase of groupware technology as well as for researchers and managers groupware and human computer interaction

applications of multi criteria decision making theories in healthcare and biomedical engineering contains several practical applications on how decision making theory could be used in solving problems relating to the selection of best alternatives the book focuses on assisting decision makers government organizations companies general public etc in making the best and most appropriate decision when confronted with multiple alternatives the purpose of the analytical mcdm techniques is to support decision makers under uncertainty and conflicting criteria while making logical decisions the knowledge of the alternatives of the real life problems properties of their parameters and the priority given to the parameters have a great effect on consequences in decision making in this book the application of mcdm has been provided for the real life problems in health and biomedical engineering issues provides a comprehensive analysis and application multi criteria decision making methods presents detail information about mcdm and their usage covers state of the art mcdm methods and offers applications of mcdm for health and biomedical engineering purposes

a selection of annotated references to unclassified reports and journal articles that were introduced into the nasa scientific and technical information system and announced in scientific and technical aerospace reports star and international aerospace abstracts iaa
