originally published in 1988 inner city problems in advanced countries are being exacerbated by the decentralisation of economic activities and higher income groups only offices and tourism offer some prospects of growth but these vary in their potential from one city to another this book assesses changes in the structure of urban areas concentrating on the process of decentralisation and the consequences for the inner city and city centre it examines and evaluates policies and makes suggestions for the future management of the city here is a book about the practical design of communities and housing in which people can enjoy a good quality of life free from crime and fear of crime recognising that crime vandalism and anti social behaviour are issues of high public concern and that the driving forces behind crime are numerous this book argues that good design can help tackle many of these issues it shows how through integrating simple crime prevention principles in the design process it is possible almost without notice to make residential environments much safer written from the perspective of an architect and town planner this book offers practical design guidelines through a set of accessible case studies drawn from the uk usa the netherlands and scandinavia each example illustrates how success comes when design solutions reflect local characteristics and where communities are truly sustainable where residents feel they belong and where crime is dealt with as part of the bigger picture of urban design the heavy dependency on private cars has shaped the design of cities while offering fast comfortable and convenient commutes cars have become the most popular method of transportation but are also a health crisis due to the toxic emissions they release into the atmosphere as well as the high death toll from traffic accidents for these reasons there is a need to minimize the use of cars within cities in favor of greener and humanized urban design that would improve the quality of life and reduce the global threat of climate change humanizing cities through car free city development and transformation is an essential publication that explores the concepts of car free cities and city humanization as possible solutions to reduce the deteriorating effect on the environment and the community the publication discusses the urban initiative to implement pedestrianization and humanization of cities and public spaces to promote the concept of car free living featuring coverage on a wide range of topics including city humanization smart mobility and urban policies this book is ideally designed for urban planners environmentalists government officials policymakers architects transportation authorities researchers academicians and students one of the american planning association s most popular and influential books is finally in paperback with a new preface from the author on how thinking about parking has changed since this book was first published in this no holds barred treatise donald shoup argues that free parking has contributed to auto dependence rapid urban sprawl extravagant energy use and a host of other problems planners mandate free parking to alleviate congestion but end up distorting transportation choices debasing urban design damaging the economy and degrading the environment ubiquitous free parking helps explain why our cities sprawl

more for cars than for people and why american motor vehicles now consume one eighth of the world s total oil production but it doesn t have to be this way shoup proposes new ways for cities to regulate parking namely charge fair market prices for curb parking use the resulting revenue to pay for services in the neighborhoods that generate it and remove zoning requirements for off street parking such measures according to the yale trained economist and ucla planning professor will make parking easier and driving less necessary join the swelling ranks of shoupistas by picking up this book today you ll never look at a parking spot the same way again this publication contains a range of oral and written evidence taken by the committee in relation to its inquiry into parking enforcement policy in britain hcp 748 i session 2005 06 isbn 0215029305 including evidence from officials representing the department for transport transport for london the local government association and various local authorities the national parking adjudicator service and the chief parking adjudicator for london the british parking association and the freight transport association this report recommends that a default answer of yes to development should be removed from the national planning policy framework npff the phrase significantly and demonstrably must also be removed from the presumption that all planning applications should be approved unless the adverse effects significantly and demonstrably outweigh the benefits because it adds a further barrier to the achievement of truly sustainable development the definition of sustainable development is inadequate and often conflated with sustainable economic growth the framework gives the impression that greater emphasis should be given in planning decisions to economic growth undermining the equally important environmental and social elements of the planning system the nppf should require local planning decisions to be taken in accordance with the presumption in favour of sustainable development consistent with local plans it is unacceptable that so many parts of england have yet to develop and adopt a new local plan clarity within the nppf has suffered in the pursuit of brevity inconsistent drafting could create gaps in planning policy or guidance that could lead to a huge expansion in the size of local plans as local authorities attempt to plug those gaps the test for viability as currently worded risks allowing unsustainable developments to go ahead if measures to make them sustainable are deemed to make them unviable for the developer mps also call for a sensible transition period to give local authorities time to put local plans in place where they have not already done so this book provides a critical overview of the relationships between planning and railway management and development during the key period in the 20th century when the railway was in public ownership 1948 94 it assesses the strength of the relationships when working in collaboration with the private sector the book then focuses on the interplay between planning and railway since privatization in 1994 and points to best practice for the future in institutional structures and policy development to secure improved outcomes this title was first published in 2002 regional planning and government in the uk is undergoing a period of tremendous activity with a wide range of new policies innovative techniques and experiments being tested this volume provides an overview of developments describing and analyzing the legislative political and economic contexts within which changes are occurring and assessing the continuing difficulties that face planners and others operating in the new arrangements for regional planning this book examines trends in ageing societies and urban development before assessing

the impact of ageing populations on urban areas and strategies for policy and governance it includes 9 case studies how well have architects succeeded in building housing and what lessons can be learned from their triumphs and failures the housing design handbook will give you a complete understanding of what makes successful housing design through the analysis of work by levitt bernstein and a wide range of other uk practices it illustrates good design principles and accumulates a wealth of knowledge in a readily accessible format for the first time written by a recognised authority in the field the book provides a range of cases to illustrate the way that different issues in the design of housing have been approached and with what degree of success a review of the place of housing as the most significant built form in the urban landscape an understanding of the importance of achieving a sense of place as the bedrock of social continuity a discussion of how flexibility might be achieved in order to accommodate future changes in housing need if wholesale demolition and replacement is to be avoided more recent examples which explore why certain social groupings are more resistant to design innovation than others and why there has been such an architectural breakthrough in market led higher density urban living david levitt examines the ideas behind the schemes and assesses how successful and sustainable those ideas have proved making this an essential reference for professionals and students practicing and studying the design and commissioning of housing the twin processes of planning and property development are inextricably linked it s not possible to carry out a development strategy without an understanding of the planning process and equally planners need to know how real estate developers do their job this third edition of urban planning and real estate development guides students through the procedural and practical aspects of developing land from the point of view of both planner and developer the planning system is explained from the increasing emphasis on spatial planning at a regional level down to the detailed perspective of the development control process and the specialist requirements of historic buildings and conservation areas at the same time the authors explain the entire development process from inception through appraisal valuation and financing to completion and disposal this is an invaluable textbook for real estate and planning students and helps to meet the requirements of the rics and rtpi assessment of professional competence views on spatial planning and its role have changed significantly over the past few years and the issues it deals with have become increasingly more complex there are more players involved in the development of a particular area or place than ever before and there is also a greater interest in urban design issues there are also new ways of conceiving of place space and society relations it is therefore necessary that all those involved in the production consumption and valuing of places and territories develop and re learn new ways of analyzing and managing space this volume provides a platform for such a re examination it first discusses how spaces and places are understood and conceptualized and offers a dialogue between different approaches to the understanding of space emphasizing the need for a dynamic perspective the book then goes on to examine the changing governance processes through various case studies which illustrate a range of innovative spatial planning projects from across europe and the united states by bringing together an examination of both space and the process through which the space is created and managed this volume offers a unique multi dimensional understanding of spatial planning and suggests

ways of negotiating how society should shape and influence the transformation of places this book directly addresses the major planning debate of our time the delivery and quality of new housing development as pressure for new housing development in england increases a widespread desire to improve the design of the resulting residential environments becomes evermore apparent with increasing condemnation of the standard products of the volume housebuilders in recent years central government has come to accept the need to deliver higher quality living environments and the important role of the planning system in helping to raise design standards housing design quality focuses on this role and in particular on how the various policy instruments available to public authorities can be used in a positive manner to deliver higher quality residential developments transport issues are critically embedded in everyday life for this very reason ways of addressing such issues are almost always hugely politically contentious as a quick glance at local and national media will testify such contentiousness is growing as ever increasing mobility for many in western society has led to a critical examination of the fundamental basis by which transport issues are considered in government and beyond despite the strength of this examination the implementation of new approaches to dealing with transport issues has proved deeply problematic the politics of mobility pioneers a methodological and theoretical framework derived from the social and political sciences to shed light on the complexities of dealing with these issues it mobilises three case studies that highlight the realpolitik of dealing with such concerns for students practitioners researchers and activists achieving sustainable urban form represents a major advance in the sustainable development debate it presents research which defines elements of sustainable urban form density size configuration detailed design and quality from macro to micro scale case studies from europe the usa and australia are used to illustrate good practice within the fields of planning urban design and architecture this principal source for company identification is indexed by standard industrial classification code geographical location and by executive and directors names significantly updated in reference to the latest construction standards and new building types sustainable design integrated into chapters throughout over half of the entire book has now been updated since 2015 over 100 000 copies sold to successive generations of architects and designers this book belongs in every design office the metric handbook is the major handbook of planning and design data for architects and architecture students covering basic design data for all the major building types it is the ideal starting point for any project for each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of as well as buildings the metric handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements the metric handbook is the unique reference for solving everyday planning problems this full colour student book gives candidates a further five units to complete the double award it is exactly matched to the specifications of ocr this regional spatial strategy rss for yorkshire and the humber is based upon the selective review of rpg 12 2001 isbn 0117536180 the review addressed rural regeneration coastal communities culture and tourism climate change renewable energy flood risk waste management and transport the rss has statutory status under the

planning and compulsory purchase act 2003 and must be taken into account by local authorities when preparing their development plans and local transport plans specific chapters cover regional context vision objectives and strategy regional spatial strategy the economy housing transport social infrastructure built and natural environment resource management monitoring implementation and review this revised fourteenth edition reinforces this title's reputation as the bible of british planning it provides a thorough explanation of planning processes including the institutions involved tools systems policies and changes to land use the rough guide to new england is the ultimate travel guide to this compellingly historic region packed with comprehensive coverage of every attraction honest accurate reviews detailed practical information new top 5 lists insider tips and illuminating photographs throughout will ensure that your visit is a truly memorable one discover new england's highlights with in depth accounts on everything from apple picking and beachcombing to yankee cooking and zip lines hike the appalachian trail or meander down country roads amid autumn foliage savour new england's best clam chowder regional beer and blueberry pie spot a lighthouse or even a whale and walk in the footsteps of revolutionaries explore it all with our inspiring new itineraries up to date descriptions and stylish colour maps pinpointing new england's best hotels shops restaurants and drinking taverns for every budget make the most of your time with the rough guide to new england now available in epub format this book considers the major forces that have emerged to reshape planning following 2010 including national infrastructure project delivery the localism act 2011 and neighbourhood planning this period also saw the introduction of the replacement of regional plans by new strategic sub regional approaches in combined local authorities for functional economic areas all of this is set within the un's new urban agenda brexit the changing programme for the eu post 2021 and the likely effects that these will have on uk planning practice there is also a discussion on the evolving planning policies in scotland wales and northern ireland and the ways in which the uk nations are beginning to work together more closely and with ireland jersey guernsey and the isle of man through the spatial planning group in the british irish council although primarily focused on the uk the text sets some of the policy discussions in a wider international context including agreements on the environment and the emerging alignment of governance and economies in newly recognised sub regional spaces it follows effective practice in spatial planning 2011 which addressed the developments in planning in the uk between 2004 and 2010 and discusses the major changes in all aspects of planning policy in the following period clearly demonstrates the specific characteristics that make for comprehensible friendly and controllable places responsive environments as opposed to the alienating environments often imposed today by means of sketches and diagrams it shows how they may be designed in to places or buildings this is a practical book about architecture and urban design it is most concerned with the areas of design which most frequently go wrong and impresses the idea that ideals alone are not enough ideals must be linked through appropriate design ideas to the fabric of the built environment itself this book is a practical attempt to show how this can be done this book addresses the links between transport and sustainable urban development from an analysis of the global picture to issues in transport and energy intensity public policy and the institutional

and organisational constraints on change the central part of the book explores these links in more detail at city level covering land use and development economic measures and the role that technology can play the final part looks for inspiration from events in developing countries and the means by which we can move from the unsustainable present to a more sustainable future are you concerned about the state of current housing provision worried about further decline in the years ahead decent homes for all addresses fundamental questions about the current housing crisis examining its history and evolution the first text on the housing planning interface it explores the relationship between planning and housing supply focusing on housing supply the quality and form of residential development affordability and sustainability and the changing nature of planning itself the questions covered include why have we moved away from state housing provision how might the current crisis in housing affordability be addressed through planning policy why has recent debate broadened to encompass the idea of sustainable communities how will we deliver quality affordable housing in the future what role should the planning system play in delivering decent homes in the years ahead this comprehensive narrative provides students planners and researchers with a valuable account of the evolving relationship between planning and housing to aid contextual understanding and suggest how current issues might evolve in the future this book re addresses the concepts of neighbourhood and community in a refreshing and challenging way it will be of immense benefit not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow from the foreword by jed griffiths past president of the royal town planning institute there is widespread support for the principle of creating more sustainable communities but much hazy wishful thinking about what this might mean in practice in reality we witness more the death of local neighbourhoods than their creation or rejuvenation reflecting an increasingly mobile privatized and commodified society sustainable communities examines the practicalities of re inventing neighbourhoods it is neither an idealistic utopian tract nor a designer s manual but is rather a serious attempt to address the real issues this collection of expert contributions examines the nature of local community and methods of building social capital presents the findings of a world wide survey of eco neighbourhoods and eco villages with case studies from the united kingdom europe america and australia develops a fresh perspective on the planning and design of neighbourhoods in urban areas based on the eco system approach explores practical programmes for local resource management and the implications for community based decision making provides a detailed appendix listing current eco village and eco neighbourhood schemes by country written by an interdisciplinary team of social and environmental scientists town planners and urban designers this is a thought provoking and important contribution to both the theory and practice of the development of sustainable communities town and country planning in the uk has become the bible of british planning it provides an explanation of the nature of planning the institutions and organisations involved the plans and other tools used by planners planning policies and more studies of the organisation and location of retailing activity have played a central role in the emergence of urban geography as a major area of academic study moreover retailing is increasingly the focus of interdisciplinary research with economists sociologists psychologists and

marketing specialists all contributing this book surveys and sets in context the wide range of research work that has recently been done on retailing it concentrates on western industrial societies particularly Britain and the USA and considers empirical research theory and theoretical applications topics covered include location analysis which is a traditional area of academic interest consumer behaviour which is of particular interest to psychologists and retail organisation and government involvement which will interest all those concerned especially those actually involved in retail planning and management this comprehensive book is the first substantial review of research in retail geography and suggests many future lines of research within the field originally published 1980 airport terminals covers the significance of airport terminals and the politics of design this book is organized into seven parts encompassing 28 chapters that examine the architectural quality of airport terminals the first part highlights the basic terminal design principles including considerations of location size capacity and functional types the subsequent parts consider the taxonomy of aircraft terminal forms and the external landside factors these topics are followed by descriptions of the policies layouts configurations data sheets baggage handling flight information systems signage and fire criteria of airport terminals the final parts look into the external airside factors such as aircraft docking and loading as well as the redevelopment of existing airport terminals this book will be of use to architects engineers and airport terminal managers

Car Parking Standards in Development Control 1983

originally published in 1988 inner city problems in advanced countries are being exacerbated by the decentralisation of economic activities and higher income groups only offices and tourism offer some prospects of growth but these vary in their potential from one city to another this book assesses changes in the structure of urban areas concentrating on the process of decentralisation and the consequences for the inner city and city centre it examines and evaluates policies and makes suggestions for the future management of the city

Car Parking Standards in Development Control 1983

here is a book about the practical design of communities and housing in which people can enjoy a good quality of life free from crime and fear of crime recognising that crime vandalism and anti social behaviour are issues of high public concern and that the driving forces behind crime are numerous this book argues that good design can help tackle many of these issues it shows how through integrating simple crime prevention principles in the design process it is possible almost without notice to make residential environments much safer written from the perspective of an architect and town planner this book offers practical design guidelines through a set of accessible case studies drawn from the uk usa the netherlands and scandinavia each example illustrates how success comes when design solutions reflect local characteristics and where communities are truly sustainable where residents feel they belong and where crime is dealt with as part of the bigger picture of urban design

Traffic Engineering & Control 1998

the heavy dependency on private cars has shaped the design of cities while offering fast comfortable and convenient commutes cars have become the most popular method of transportation but are also a health crisis due to the toxic emissions they release into the atmosphere as well as the high death toll from traffic accidents for these reasons there is a need to minimize the use of cars within cities in favor of greener and humanized urban design that would improve the quality of life and reduce the global threat of climate change humanizing cities through car free city development and transformation is an essential publication that explores the concepts of car free cities and city humanization as possible solutions to reduce the deteriorating effect on the environment and the community the publication discusses the urban initiative to implement pedestrianization and humanization of cities and public spaces to promote the concept of car free living featuring coverage on a wide range of topics including city humanization smart mobility and urban policies this book is ideally designed for urban planners environmentalists government officials policymakers architects transportation authorities researchers academicians and students

Design Out Crime 2007-03-14

this report recommends that a default answer of yes to development should be removed from the national planning policy framework npff the phrase significantly and demonstrably must also be removed from the presumption that all planning applications should be approved unless the adverse effects significantly and demonstrably outweigh the benefits because it adds a further barrier to the achievement of truly sustainable development the definition of sustainable development is inadequate and often conflated with sustainable economic growth the framework gives the impression that greater emphasis should be given in planning decisions to economic growth undermining the equally important environmental and social elements of the planning system the npff should require local planning decisions to be taken in accordance with the presumption in favour of sustainable development consistent with local plans it is unacceptable that so many parts of england have yet to develop and adopt a new local plan clarity within the npff has suffered in the pursuit of brevity inconsistent drafting could create gaps in planning policy or guidance that could lead to a huge expansion in the size of local plans as local authorities attempt to plug those gaps the test for

viability as currently worded risks allowing unsustainable developments to go ahead if measures to make them sustainable are deemed to make them unviable for the developer mps also call for a sensible transition period to give local authorities time to put local plans in place where they have not already done so

Humanizing Cities Through Car-Free City Development and Transformation 2020-06-05

this book provides a critical overview of the relationships between planning and railway management and development during the key period in the 20th century when the railway was in public ownership 1948-94 it assesses the strength of the relationships when working in collaboration with the private sector the book then focuses on the interplay between planning and railway since privatization in 1994 and points to best practice for the future in institutional structures and policy development to secure improved outcomes

The High Cost of Free Parking 2017-10-20

this title was first published in 2002 regional planning and government in the uk is undergoing a period of tremendous activity with a wide range of new policies innovative techniques and experiments being tested this volume provides an overview of developments describing and analyzing the legislative political and economic contexts within which changes are occurring and assessing the continuing difficulties that face planners and others operating in the new arrangements for regional planning

Parking Policy and Enforcement 2006-06-22

this book examines trends in ageing societies and urban development before assessing the impact of ageing populations on urban areas and strategies for policy and governance it includes 9 case studies

Metropolis 2013-12-17

how well have architects succeeded in building housing and what lessons can be learned from their triumphs and failures the housing design handbook will give you a complete understanding of what makes successful housing design through the analysis of work by levitt bernstein and a wide range of other uk practices it illustrates good design principles and accumulates a wealth of knowledge in a readily accessible format for the first time written by a recognised authority in the field the book provides a range of cases to illustrate the way that different issues in the design of housing have been approached and with what degree of success a review of the place of housing as the most significant built form in the urban landscape an understanding of the importance of achieving a sense of place as the bedrock of social continuity a discussion of how flexibility might be achieved in order to accommodate future changes in housing need if wholesale demolition and replacement is to be avoided more recent examples which explore why certain social groupings are more resistant to design innovation than others and why

there has been such an architectural breakthrough in market led higher density urban living david levitt examines the ideas behind the schemes and assesses how successful and sustainable those ideas have proved making this an essential reference for professionals and students practicing and studying the design and commissioning of housing

The National Planning Policy Framework 2011-12-21

the twin processes of planning and property development are inextricably linked it is not possible to carry out a development strategy without an understanding of the planning process and equally planners need to know how real estate developers do their job this third edition of urban planning and real estate development guides students through the procedural and practical aspects of developing land from the point of view of both planner and developer the planning system is explained from the increasing emphasis on spatial planning at a regional level down to the detailed perspective of the development control process and the specialist requirements of historic buildings and conservation areas at the same time the authors explain the entire development process from inception through appraisal valuation and financing to completion and disposal this is an invaluable textbook for real estate and planning students and helps to meet the requirements of the rics and rtpi assessment of professional competence

***Railways, Urban Development and Town Planning in Britain: 1948–2008* 2012-11-28**

views on spatial planning and its role have changed significantly over the past few years and the issues it deals with have become increasingly more complex there are more players involved in the development of a particular area or place than ever before and there is also a greater interest in urban design issues there are also new ways of conceiving of place space and society relations it is therefore necessary that all those involved in the production consumption and valuing of places and territories develop and re learn new ways of analyzing and managing space this volume provides a platform for such a re examination it first discusses how spaces and places are understood and conceptualized and offers a dialogue between different approaches to the understanding of space emphasizing the need for a dynamic perspective the book then goes on to examine the changing governance processes through various case studies which illustrate a range of innovative spatial planning projects from across europe and the united states by bringing together an examination of both space and the process through which the space is created and managed this volume offers a unique multi dimensional understanding of spatial planning and suggests new ways of negotiating how society should shape and influence the transformation of places

***Contemporary Issues in Regional Planning* 2017-11-01**

this book directly addresses the major planning debate of our time the delivery and quality of new housing development as pressure for new housing

development in england increases a widespread desire to improve the design of the resulting residential environments becomes evermore apparent with increasing condemnation of the standard products of the volume housebuilders in recent years central government has come to accept the need to deliver higher quality living environments and the important role of the planning system in helping to raise design standards housing design quality focuses on this role and in particular on how the various policy instruments available to public authorities can be used in a positive manner to deliver higher quality residential developments

Ageing in Cities 2015-04-30

transport issues are critically embedded in everyday life for this very reason ways of addressing such issues are almost always hugely politically contentious as a quick glance at local and national media will testify such contentiousness is growing as ever increasing mobility for many in western society has led to a critical examination of the fundamental basis by which transport issues are considered in government and beyond despite the strength of this examination the implementation of new approaches to dealing with transport issues has proved deeply problematic the politics of mobility pioneers a methodological and theoretical framework derived from the social and political sciences to shed light on the complexities of dealing with these issues it mobilises three case studies that highlight the realpolitik of dealing with such concerns for students practitioners researchers and activists

The Housing Design Handbook 2012-12-06

achieving sustainable urban form represents a major advance in the sustainable development debate it presents research which defines elements of sustainable urban form density size configuration detailed design and quality from macro to micro scale case studies from europe the usa and australia are used to illustrate good practice within the fields of planning urban design and architecture

Standard & Poor's Register of Corporations, Directors and Executives 2001

this book considers the major forces that have emerged to reshape planning following 2010 including national infrastructure project delivery the localism act 2011 and neighbourhood planning this period also saw the introduction of the replacement of regional plans by new strategic sub regional approaches in combined local authorities for functional economic areas all of this is set within the un s new urban agenda brexit the changing programme for the eu post 2021 and the likely effects that these will have on uk planning practice there is also a discussion on the evolving planning policies in scotland wales and northern ireland and the ways in which the uk nations are beginning to work together more closely and with ireland jersey guernsey and the isle of man through the spatial planning group in the british irish council although primarily focused on the uk the text sets some of the policy discussions in a wider international context including agreements on the environment and the emerging alignment of governance and economies in newly recognised sub regional spaces it follows effective practice in spatial planning 2011 which addressed the developments in planning in the uk between 2004 and 2010 and discusses the major changes in all aspects of planning policy in the following period

Metric Handbook 2018-02-23

clearly demonstrates the specific characteristics that make for comprehensible friendly and controllable places responsive environments as opposed to the alienating environments often imposed today by means of sketches and diagrams it shows how they may be designed in to places or buildings this is a practical book about architecture and urban design it is most concerned with the areas of design which most frequently go wrong and impresses the idea that ideals alone are not enough ideals must be linked through appropriate design ideas to the fabric of the built environemnt itself this book is a practical attempt to show how this can be done

Travel and Tourism 2005

this book addresses the links between transport and sustainable urban development from an analysis of the global picture to issues in transport and energy intensity public policy and the institutional and organisational constraints on change the central part of the book explores these links in more detail at city level covering land use and development economic measures and the role that technology can play the final part looks for inspiration from events in developing countries and the means by which we can move from the unsustainable present to a more sustainable future

Regional Spatial Strategy for Yorkshire and the Humber to 2016 2004

are you concerned about the state of current housing provision worried about

further decline in the years ahead decent homes for all addresses fundamental questions about the current housing crisis examining its history and evolution the first text on the housing planning interface it explores the relationship between planning and housing supply focusing on housing supply the quality and form of residential development affordability and sustainability and the changing nature of planning itself the questions covered include why have we moved away from state housing provision how might the current crisis in housing affordability be addressed through planning policy why has recent debate broadened to encompass the idea of sustainable communities how will we deliver quality affordable housing in the future what role should the planning system play in delivering decent homes in the years ahead this comprehensive narrative provides students planners and researchers with a valuable account of the evolving relationship between planning and housing to aid contextual understanding and suggest how current issues might evolve in the future

Town and Country Planning in the UK 2006-10-16

this book re addresses the concepts of neighbourhood and community in a refreshing and challenging way it will be of immense benefit not only to town planners but also to all those professional and voluntary groups and politicians who seek to create the new communities of tomorrow from the foreword by jed griffiths past president of the royal town planning institute there is widespread support for the principle of creating more sustainable communities but much hazy wishful thinking about what this might mean in practice in reality we witness more the death of local neighbourhoods than their creation or rejuvenation reflecting an increasingly mobile privatized and commodified society sustainable communities examines the practicalities of re inventing neighbourhoods it is neither an idealistic utopian tract nor a designer s manual but is rather a serious attempt to address the real issues this collection of expert contributions examines the nature of local community and methods of building social capital presents the findings of a world wide survey of eco neighbourhoods and eco villages with case studies from the united kingdom europe america and australia develops a fresh perspective on the planning and design of neighbourhoods in urban areas based on the eco system approach explores practical programmes for local resource management and the implications for community based decision making provides a detailed appendix listing current eco village and eco neighbourhood schemes by country written by an interdisciplinary team of social and environmental scientists town planners and urban designers this is a thought provoking and important contribution to both the theory and practice of the development of sustainable communities

Minimum Wage and Maximum Hours Standards Under the Fair Labor Standards Act 1969

town and country planning in the uk has become the bible of british planning it provides an explanation of the nature of planning the institutions and organisations involved the plans and other tools used by planners planning policies and more

Minimum Wage and Maximum Hours Standards Under the Fair Labor Standards Act; [report] 1967

studies of the organisation and location of retailing activity have played a central role in the emergence of urban geography as a major area of academic study moreover retailing is increasingly the focus of interdisciplinary research with economists sociologists psychologists and marketing specialists all contributing this book surveys and sets in context the wide range of research work that has recently been done on retailing it concentrates on western industrial societies particularly britain and the usa and considers empirical research theory and theoretical applications topics covered include location analysis which is a traditional area of academic interest consumer behaviour which is of particular interest to psychologists and retail organisation and government involvement which will interest all those concerned especially those actually involved in retail planning and management this comprehensive book is the first substantial review of research in retail geography and suggests many future lines of research within the field originally published 1980

The Rough Guide to New England 2012-12-20

airport terminals covers the significance of airport terminals and the politics of design this book is organized into seven parts encompassing 28 chapters that examine the architectural quality of airport terminals the first part highlights the basic terminal design principles including considerations of location size capacity and functional types the subsequent parts consider the taxonomy of aircraft terminal forms and the external landside factors these topics are followed by descriptions of the policies layouts configurations data sheets baggage handling flight information systems signage and fire criteria of airport terminals the final parts look into the external airside factors such as aircraft docking and loading as well as the redevelopment of existing airport terminals this book will be of use to architects engineers and airport terminal managers
