2011-03-02

there are many reasons to be curious about the way people learn and the past several decades have seen an explosion of research that has important implications for individual learning schooling workforce training and policy in 2000 how people learn brain mind experience and school expanded edition was published and its influence has been wide and deep the report summarized insights on the nature of learning in school aged children described principles for the design of effective learning environments and provided examples of how that could be implemented in the classroom since then researchers have continued to investigate the nature of learning and have generated new findings related to the neurological processes involved in learning individual and cultural variability related to learning and educational technologies in addition to expanding scientific understanding of the mechanisms of learning and how the brain adapts throughout the lifespan there have been important discoveries about influences on learning particularly sociocultural factors and the structure of learning environments how people learn ii learners contexts and cultures provides a much needed update incorporating insights gained from this research over the past decade the book expands on the foundation laid out in the 2000 report and takes an in depth look at the constellation of influences that affect individual learning how people learn ii will become an indispensable resource to understand learning throughout the lifespan for educators of students and adults

Learning Skills and Organizer Guide

1997-09-01

there are words that are so familiar they obscure rather than illuminate the thing they mean and learning is such a word it seems so ordinary everyone does it actually it s more of a black box which dehaene cracks open to reveal the awesome secrets within the new york times book review an illuminating dive into the latest science on our brain s remarkable learning abilities and the potential of the machines we program to imitate them the human brain is an extraordinary learning machine its ability to reprogram itself is unparalleled and it remains the best source of inspiration for recent developments in artificial intelligence but how do we learn what innate biological foundations underlie our ability to acquire new information and what principles modulate their efficiency in how we learn stanislas dehaene finds the boundary of computer science neurobiology and cognitive psychology to explain how learning

really works and how to make the best use of the brain's learning algorithms in our schools and universities as well as in everyday life and at any age

How to Learn Anything

2023-04-13

this book takes a radically new approach to the well worn topic of children's relationship with the media avoiding the risks and benefits paradigm while examining very young children's interactions with film and television bazalgette proposes a refocus on the learning processes that children must go through in order to understand what they are watching on televisions phones or ipads to demonstrate this she offers unique insight from research done with her twin grandchildren starting from just before they were two years old with analysis drawn from the field of embodied cognition to help identify minute behaviours and expressions as signals of emotions and thought processes the book makes the case that all inquiry into early childhood movie viewing should be based on the premise that learning usually self driven is taking place throughout
