defined has been invoked as a common justification in the pursuit of remodelling policies laws and institutions both at the international and in the domestic politico legal showground the broader central theme that this book explores is the normative vibe under which the present day counterterrorism discourse is construed and sculpted in the legislative and institutional structures of an authoritarian state where the political power and government institutions are functioning under a single party monopolised system presenting the ethiopian legislative and institutional frameworks as a case study the book critically reflects on the extent that the international legal and or institutional counterterrorism response is sensitised in a manner lessening the risk of conflating authoritarian regime s unbearable reactions to citizens legitimate demands and resistances against its repression vis à vis that of its response to the common threat of international terrorism in particular the book ponders whether or not the range of the substantive and procedural aspects of the ethiopian antiterrorism legislative and institutional frameworks are wrought to fit into the main objectives and standards that emanate from the pertinent international laws relating to terrorism and the international human rights law as well as the domestic constitutional law maxims this text discusses with great clarity the major arguments as to the rights and responsibilities of property ownership in particular the arguments that hold that there are natural rights derived from first occupancy labour utility liberty and virtue are considered as are the standard anti property arguments based on disutility virtue and inequality and the belief that justice in distribution must take precedence over private ownership lawrence becker goes on to contend that there are four sound lines of argument for private property that together with what is sound in the anti property arguments must be co ordinated to form the foundations of a new theory he therefore expounds a concise but sophisticated theory of property that is relevant to the modern world and concludes by indicating some of the implications of his theory this volume by robert kolb and gloria gaggioli contributed by some of the most renowned experts in the field devotes an impressive amount of legal analysis to the technically poor records to maintain a real world perspective children s rights appear universal inalienable and indivisible intended to advance young people s interests yet in practice evidence suggests the contrary the international framework of treaties procedures and national policies contains fundamental contradictions that weaken commitments to children s real world protections brian gran helps us understand what is at stake when children s rights are compromised this insightful text grounds readers in core theories and key data about children s legal entitlements the chapters tackle central questions about what rights accrue to young people whether they advance equality and how they influence children s identities freedoms and societal participation ultimately this book shows how current frameworks hinder young people from possessing and benefiting from human rights arguing that they function as cynical invitations to question whether we truly believe children are endowed with human rights the sociology of children s rights offers a critical and accessible introduction to understanding a complex issue in the contemporary world and is a compelling read for students and researchers concerned with human rights in sociology political science law social work and childhood studies the jurisprudence of the international court of justice generally demonstrates that no rule of international law can be interpreted and applied without regard to its innate values and the basic principles of human rights through its case law the icj has made immense contributions to the development of human rights law and in so doing continues to provide solutions to mounting international problems such as terrorism and unilateral use of force part i of the book argues that the legislative spirit of contemporary international law lies in the doctrine of human rights and that the spirit of human rights doctrine lies in the principle of human dignity furthermore it argues that the processes of international legislation and international adjudication are inseparable and that there is no norm of international law which does not intertwine the fundamental principle of human dignity with human rights doctrine hence human rights law is more a school of law than merely a normative branch of international law and the icj s willingness to engage in the development of human rights law depends upon which judicial ideology its judges subscribe to in order to evaluate how this human rights spirit is manifested or occasionally not manifested through the vast jurisprudence of the icj parts ii and iii critically examine the court s principal contentious and advisory cases in which it has treated human rights questions the legal reasoning of the court and the opinions appended to its decisions by its individual judges are analysed in light of the principle of human dignity and the doctrine of human rights this volume examines critically some of the most pertinent and controversial issues relating to children and health care insights are offered into some of today s leading controversies about children and their rights the focus is on such issues as anorexia circumcision autism and gender reassignment a number of the essays in this collection were previously published in the international journal of children s rights this book evaluates the effectiveness of current international human rights law and in particular the recent istanbul convention in eradicating so called honour killings in turkey so called honour killings have become an issue of concern for the international community in turkey in particular the practice still exists despite the adoption of the relevant human rights instruments the book argues that the improvement of the status of women in turkey in accordance with gender equality as well as the application of the principle of state due diligence both requirements of the istanbul convention and international human rights law are fundamental means towards eradicating the killing of women in the name of honour using feminist approaches in particular the intersectionality approach the study looks at the application of such standards as well as the current obstacles through such a lens the study discusses the strengths and weaknesses of the turkish constitution turkish civil code turkish penal code and law to protect family and prevent violence against women and questions the judicial approach to the implementation of the women s right to life it identifies the lacunae in the turkish legislation that allow inadequate legal protection for women and the inconsistency of the judicial approach to the definition of the so called honour killings in the judgements the study then recommends some concrete amendments to the relevant legal provisions in order to better reflect the international framework and the feminist approaches the book will be a valuable resource for academics researchers and policy makers in the areas of international human rights law and feminist legal theory looking at two of the key paradigms of the post cold war era national sovereignty and human rights this book examines the possibilities for their reconciliation from a global perspective the real or imagined fear of a flood of immigrants has caused and fuelled the surge of an amalgam of populist political forces anti immigrant movements and exclusionist nationalism in many developed countries in the last decade we have witnessed the emergence of two phenomena in the political and legal spheres on the one hand there are liberal globalists asking for respect and the protection of the basic human rights of migrants and asylum seekers and arguing for their civic and social integration into host societies on the other hand there are growing calls for a tougher stance on immigration and powerful populist politicians and governments have

emerged in many developed countries how can the idea of universal human rights survive exclusionist nationalism that uses a populist unscrupulous approach to its advantage the contributors to this book explore the meaning of and possible solutions to this dilemma using a wide range of approaches and seek appropriate ways of dealing with these normative predicaments shared by many developed societies scholars and students of human rights migration nationalism and multiculturalism will find this a very valuable resource almost all junior barristers in civil practice are likely to encounter family law work in their first years of practice this manual therefore provides a detailed introduction to the key areas of the substantive family law of which the junior practitioner should
