

Free reading Naval architecture and marine engineering nautilus (Read Only)

originally published in 1938 this book was written to provide an account of the historical development of naval and marine engineering the material which formed the basis of the text was gathered together from a variety of sources during a period of approximately thirty years technical papers presidential addresses journals textbooks biographies official regulations personal letters reminiscences and previously unpublished manuscripts were all drawn upon to illustrate the many aspects of naval and marine engineering numerous illustrative figures are included throughout this book will be of value to anyone with an interest in the history of engineering nuclear engineering mathematical modeling and simulation presents the mathematical modeling of neutron diffusion and transport aimed at students and early career engineers this highly practical and visual resource guides the reader through computer simulations using the monte carlo method which can be applied to a variety of applications including power generation criticality assemblies nuclear detection systems and nuclear medicine to name a few the book covers optimization in both the traditional deterministic framework of variational methods and the stochastic framework of monte carlo methods specific sections cover the fundamentals of nuclear physics computer codes used for neutron and photon radiation transport simulations applications of analyses and simulations optimization techniques for both fixed source and multiplying systems and various simulations in the medical area where radioisotopes are used in cancer treatment provides a highly visual and practical reference that includes mathematical modeling formulations models and methods throughout includes all current major computer codes such as anisn mcnp and matlab for user coding and analysis guides the reader through simulations for the design optimization of both present day and future nuclear systems the lloyd s register of shipping records the details of merchant vessels over 100 gross tonnes which are self propelled and sea going regardless of classification before the time only those vessels classed by lloyd s register were listed vessels are listed alphabetically by their current name the lloyd s register of shipping records the details of merchant vessels over 100 gross tonnes which are self propelled and sea going regardless of classification before the time only those vessels classed by lloyd s register were listed vessels are listed alphabetically by their current name an alphabetical arrangement of the ships of the

continental and united states navies with a historical sketch of each one first published in 1981 routledge is an imprint of taylor francis an informa company tracing the history of u s marine force and battalion reconnaissance from its formation in 1898 through its operations during the vietnam war 1963 1971 this book provides insight into force recon s selection training and deployment emphasis on actions with the south vietnamese arvn highlights important lessons for today s special forces community illustrating the inter service cooperation of recon operations firsthand accounts of marines who served are included along with photographs maps and appendices vice admiral allan rockwell mccann left no reminiscences that might reveal a deeper sense of his extraordinary service but naval historian carl lavo has filled that void by writing this revealing and often inspiring biography among mccann s many accomplishments served as liaison officer for the modification of the antiquated o 12 submarine into the privately leased nautilus that made the first attempt to sail beneath the arctic ice shelf in 1931 pioneered the mccann submarine rescue chamber directed fire from the sub tender pelias at japanese aircraft attacking pearl harbor commanded the battleship iowa during the battle of leyte gulf was chief of staff of the navy s 10th fleet that stymied a last ditch effort to attack north america via u boats headed the navy task force that transported president truman to the potsdam conference and as comsubpac was aboard the first submarine to navigate under the polar ice in 1947 this book is an overdue appreciation of a significant admiral who has been all but ignored in naval history the deep seabed beyond national jurisdiction known as the area comprises almost three quarters of the entire surface area of the oceans and is home to an array of prized commodities including valuable metals and rare earth elements in recent years there has been a marked growth in deep seabed investment by private corporate actors and an increasing impetus towards exploitation this book addresses the unresolved legal challenges which this increasing corporate activity will raise over the coming years including in relation to matters of common management benefit sharing marine environmental protection and investment protection acting under the united nations convention on the law of the sea unclos the international seabed authority is responsible for regulating the area for the benefit of humanity and granting mining contracts a product of its history the unclos deep seabed regime is an unlikely hybrid of capitalist and communist values embracing the role of private actors while enshrining principles of resource distribution as technological advances begin to outstrip legal developments this book assesses the tension between corporate commercial activity in

the area and the achievement of the common heritage maritime border diplomacy edited by myron h nordquist and john norton moore examines critical issues in international maritime boundary disputes together with the important global role of indonesia whose maritime boundaries are imperative to its sovereign status identity stressing the seminal importance of the un convention on the law of the sea to world order international experts analyze root causes of boundary disputes including historical claims and competition for natural resources issues of preventative diplomacy and activism in maritime affairs are explored as are legal issues arising in the context of creating zones of cooperation in the oceans practical issues in fisheries and environmental management and the volatile questions involved in the south china sea are detailed the volume concludes with a substantive presentation on dispute resolution mechanisms

The Role of the Marine Engineering Superintendent **2014**

originally published in 1938 this book was written to provide an account of the historical development of naval and marine engineering the material which formed the basis of the text was gathered together from a variety of sources during a period of approximately thirty years technical papers presidential addresses journals textbooks biographies official regulations personal letters reminiscences and previously unpublished manuscripts were all drawn upon to illustrate the many aspects of naval and marine engineering numerous illustrative figures are included throughout this book will be of value to anyone with an interest in the history of engineering

Marine Engineering/log 1983

nuclear engineering mathematical modeling and simulation presents the mathematical modeling of neutron diffusion and transport aimed at students and early career engineers this highly practical and visual resource guides the reader through computer simulations using the monte carlo method which can be applied to a variety of applications including power generation criticality assemblies nuclear detection systems and nuclear medicine to name a few the book covers optimization in both the traditional deterministic framework of variational methods and the stochastic framework of monte carlo methods specific sections cover the fundamentals of nuclear physics computer codes used for neutron and photon radiation transport simulations applications of analyses and simulations optimization techniques for both fixed source and multiplying systems and various simulations in the medical area where radioisotopes are used in cancer treatment provides a highly visual and practical reference that includes mathematical modeling formulations models and methods throughout includes all current major computer codes such as anisn mcnp and matlab for user coding and analysis guides the reader through simulations for the design optimization of both present day and future nuclear systems

tracing the history of u s marine force and battalion reconnaissance from its formation in 1898 through its operations during the vietnam war 1963 1971 this book provides insight into force recon s selection training and deployment emphasis on actions with the south vietnamese arvn highlights important lessons for today s special forces community illustrating the inter service cooperation of recon operations firsthand accounts of marines who served are included along with photographs maps and appendices

Marine Engineering 1955

vice admiral allan rockwell mccann left no reminiscences that might reveal a deeper sense of his extraordinary service but naval historian carl lavo has filled that void by writing this revealing and often inspiring biography among mccann's many accomplishments served as liaison officer for the modification of the antiquated o 12 submarine into the privately leased nautilus that made the first attempt to sail beneath the arctic ice shelf in 1931 pioneered the mccann submarine rescue chamber directed fire from the sub tender pelias at japanese aircraft attacking pearl harbor commanded the battleship iowa during the battle of leyte gulf was chief of staff of the navy's 10th fleet that stymied a last ditch effort to attack north america via u boats headed the navy task force that transported president truman to the potsdam conference and as comsubpac was aboard the first submarine to navigate under the polar ice in 1947 this book is an overdue appreciation of a significant admiral who has been all but ignored in naval history

Library of Congress Subject Headings: F-O 1955

the deep seabed beyond national jurisdiction known as the area comprises almost three quarters of the entire surface area of the oceans and is home to an array of prized commodities including valuable metals and rare earth elements in recent years there has been a marked growth in deep seabed investment by private corporate actors and an increasing impetus towards exploitation this book addresses the unresolved legal challenges which this increasing corporate activity will raise over the coming years including in relation to matters of common management benefit sharing marine environmental protection and investment protection acting under the united nations convention on the law of the sea unclos the international seabed authority is responsible for regulating the area for the benefit of humanity and granting mining contracts a product of its history the unclos deep seabed regime is an unlikely hybrid of capitalist and communist values embracing the role of private actors while enshrining principles of resource distribution as technological advances begin to outstrip legal developments this book assesses the tension between corporate commercial activity in the area and the achievement of the common heritage
