excerpt from the social side of the electric railway a paper what steam has been to long distance travel in replacing the stage coach and the sail electricity is in turn to urban travel in replacing the horse car and the cable road later in this paper i will indicate the manner in which electricity may sooner or later realize the best and brightest promises made on behalf of the trans continental steam railroad but our first thought is as to electrical travel within towns and cities and the manner in which it affects social relations by modifying as with the harlequin wand of transformation all the conditions to which we have heretofore been subjected about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at [forgottenbooks.com](http://forgottenbooks.com) this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
