focusing on the relationship between literature and metropolitan culture it discusses the cultural confusion caused by bringing the foreign home this study originates in the observation that improv comedy or improvised theater has such a vast majority of white people practicing it while other improvisational or comedic art forms jazz freestyle rap stand up are historically grounded in and marked as black cultural production what it is about improv that makes it such a white space can an absence be an object of study if so what is there to study where should one look the american urban scene and in particular new york s has given us a rich cultural legacy of slang words and phrases a bonanza of popular speech hot dog rush hour butter and egg man gold digger shyster buttinsky smart aleck sidewalk superintendent yellow journalism headline straphanger tar beach the tenderloin the great white way to do a brodie these are just a few of the hundreds of popular words and phrases that were born or took on new meaning in the streets of new york in the city in slang irving lewis allen traces this flowering of popular expressions that accompanied the emergence of the new york metropolis from the early nineteenth century down to the present this unique account of the cultural and social history of america s greatest city provides in effect a lexicon of popular speech about city life with many stories allen shows how this vocabulary arose from city streets often interplaying with vaudeville radio movies comics and the popular songs of tin pan alley some terms of great pertinence to city people today have unexpectedly old pedigrees rush hour was coined by 1890 for instance and rubberneck dates to the late 1890s and became popular in new york to describe the busloads of tourists who craned their necks to see the tall buildings and the sights of the bowery and chinatown the big apple itself since 1971 the official nickname of new york appeared in the 1920s though first in reference to the city s top racetracks and to Broadway bookings as pinnacles of professional endeavor allen also tells fascinating stories behind once popular slang that is no longer in use spielers for example were the little girls in tenement districts who danced ecstatically on the sidewalks to the music of the hurdy gurdy men and when they were old enough frequented the dance halls of the lower east side following the trail of these words and phrases into the city s east side west side and all around the town from harlem to wall street and into the haunts of its high and low life the city in slang is a fascinating look at the rich cultural heritage of language about city life contributions from mick jagger keith richards charlie watts and ronnie wood over 1 400 photographs featuring many rare and previously unpublished items of priceless memorabilia foreword by craig kallman chairman and ceo of atlantic records covers the entire history of the band afterword by bill german editor and publisher of the stones fanzine beggars banquet written by guinness world record holder matt lee matt lee has been collecting rolling stones memorabilia for more than two decades he amassed so much that he had to move house he even has his own museum dedicated to stones memorabilia and he is the guinness world record holder for the largest stones memorabilia collection for the first time rolling stones hot stuff showcases his collection which spans all decades and tells the story of the stones through their memorabilia as never before this book offers a concise and yet diverse study on the chengzhongcun it has a broader scope both geographical and temporal than existing works on this topic the typical chinese urban informal settlement is related to morphologically similar communities to be found elsewhere in the world the chapters themes were inspired by the methods in historical geography citizenship studies and new cultural geography what is truly unique to this book is that ten years after the basis material of this book was defended it is enriched with practical experience and first hand observations of the rapidly changing chinese city as urbanization in china slows this book will interest sociologists urbanists and scholars of china within the last two decades intermediality has emerged as one of the most challenging concepts in media theory with no shortage of various taxonomies and definitions what prompted the writing of the essays gathered in this volume however was not a desire for more classifications applied to the world of moving pictures but a strong urge to investigate what the inter implied by the idea of intermediality stands for and what it actually entails in the cinema the book offers in each of the individual chapters a cross section view of specific instances in which cinema seems to consciously position itself in between media and arts employing techniques that tap into the multimedial complexity of cinema and bring into play the tensions generated by media differences the

introductory theoretical writings deal with the historiography of approaching intermedial phenomena in cinema presenting at the same time some of the possible gateways that can open up the cinematic image towards the perceptual frames of other media and arts the book also contains essays that examine more closely specific paradigms in the poetics of cinematic intermediality like the allure of painting in hitchcock s films the exquisite ways of framing and un framing haptical imagery in antonioni s works the narrative allegories of media differences the word and image plays and ekphrastic techniques in jean luc godard s total cinema the flâneurist intermedial gallery of moving images created by josé luis guerín or the types of intermedial metalepses in agnès varda s cinécriture from a theoretical vantage point these essays break with the tradition of thinking of intermediality in analogy with intertextuality and attempt a phenomenological re definition of intermedial relations moreover some of the analyses target films that expose the coexistence of the hypermediated experience of intermediality and the illusion of reality connecting the questions of intermediality both to the indexical nature of cinematic representation and to the specific ideological and cultural context of the films thus offering insights into a few questions regarding the politics of intermediality as well one of the most comprehensive books to focus on the relationship between cinema and the other arts this volume explores types and stylistic devices of intermediality through a wide range of case studies it addresses major theoretical issues and highlights the relevance of intermedial relations in film history mapping the theoretical field by outlining its main concepts and the research avenues pursued in the study of cinematic intermediality including the most recent approaches and methodologies it also presents some major templates of intermediality through various examples from world cinema including closer looks at films by auteurs like alfred hitchcock michelangelo antonioni jean luc godard and agnès varda supplemented by three new chapters dealing with phenomena which came into view since its first publication the revised and enlarged edition of this ground breaking volume will serve as a useful handbook to clarify key ideas and to offer insightful analyses now in paperback this book considers crime fighting from the perspective of the civilian city goer from the mid victorian garotting panics to 1914 it charts the shift from the use of body armour to the adoption of exotic martial arts through the works of popular playwrights and novelists examining changing ideals of urban middle class heroism however much you thought you knew about the stones before you read it afterwards you ll know more it s glittering simon napier bell special it s brilliant johnnie walker from sunday times bestselling author lesley ann jones on 12 july 1962 the rollin stones performed their first ever gig at london s marquee jazz club down the line a g was added a spark was lit and their destiny was sealed no going back these five white british kids set out to play the music of black america they honed a style that bled bluesy undertones into dark insinuations of women sex and drugs denounced as corruptors of youth and messengers of the devil they created some of the most thrilling music ever recorded now their sound and attitude seem louder and more influential than ever elvis is dead and the beatles are over but jagger and richards bestride the world the stones may be gathering moss but on they roll yet how did the ultimate anti establishment misfits become the global brand we know today who were the casualties and what are the forgotten legacies can the artist ever be truly divisible from the art lesley ann jones s new history tracks this contradictory disturbing granitic and unstoppable band through hope glory and exile into the juggernaut years and beyond into rock s ongoing reckoning where the stones seem more at odds than ever with the values and heritage against which they have always rebelled good bad and often ugly here are the rolling award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating new york as both a place and an idea veteran environmental journalist fred pearce used to think of invasive species as evil interlopers spoiling pristine natural ecosystems most conservationists would agree but what if traditional ecology is wrong and true environmentalists should be applauding the invaders in the new wild pearce goes on a journey to rediscover what conservation should really be about he explores ecosystems from pacific islands to the australian outback to the thames estuary digs into the questionable costs of invader species and reveals the outdated intellectual sources of our ideas about the balance of nature keeping out alien species looks increasingly flawed the new ecologists looking afresh at how species interact in the wild believe we should celebrate the dynamism of alien species and the novel ecosystems they create in an era of climate change and widespread ecological damage we must find ways to help nature regenerate embracing the new wild is our best chance the rolling stones volume 1 concert and tour posters from 1962 to 1999 one of smithsonian magazine's favorite books of 2022 with wildlife thriving in cities we have the opportunity to create vibrant urban ecosystems that serve both people and animals the accidental ecosystem tells the story of how cities across the united states went from having little wildlife to filling dramatically and unexpectedly with wild creatures today many of these cities have more large and charismatic wild animals living in them than at any time in at least the past 150 years why have so many cities the most artificial and human dominated of all earth's ecosystems grown rich with wildlife even as wildlife has declined in most of the rest of the world and what does this paradox mean for people wildlife and nature on our increasingly urban planet the accidental ecosystem is the first book to explain this phenomenon from a deep historical perspective and its focus includes a broad range of species and cities cities covered include new york city los angeles san francisco pittsburgh austin miami chicago seattle san diego atlanta philadelphia and baltimore digging into the natural history of cities and unpacking our conception of what it means to be wild this book provides fascinating context for why animals are thriving more in cities than outside of them author peter s alagona argues that the proliferation of animals in cities is largely the unintended result of human decisions that were made for reasons having little to do with the wild creatures themselves considering what it means to live in diverse multispecies communities and exploring how human and nonhuman members of communities might thrive together alagona goes beyond the tension between those who embrace the surge in urban wildlife and those who think of animals as invasive or as public safety hazards the accidental ecosystem calls on readers to reimagine interspecies coexistence in shared habitats as well as policies that are based on just humane and sustainable approaches in this era of climate crisis in which our very futures are at stake sustainability is a global imperative yet we tend to associate sustainability nature and the environment with distant places science and policy the truth is that everything is environmental from transportation to taxes work to love cities to cuisine this book is the first to examine contemporary singapore from an ecocultural lens looking at the ways that singaporean life and culture is deeply entangled with the nonhuman lives that flourish all around us the authors represent a new generation of cultural critics and environmental thinkers who will inherit the future we are creating today from chilli crab to tiger beer changi airport to pulau semakau o levels to orang minyak films these essays offer fresh perspectives on familiar subjects prompting us to recognise the incredible urgency of climate change and the need to transform our ways of thinking acting learning living and governing so as to maintain a stable planet and a decent future lonely planet's critique of human extinction as a result of the next pandemic and turns attention towards the role of pandemic catastrophe in the renegotiation of what it means to be human nested in debates in anthropology philosophy social theory and global health the book argues that fear of and fascination with the next pandemic stem not so much from an anticipation of a biological extinction of the human species as from an expectation of the loss of mastery over human non human relations christos lynteris employs the notion of the pandemic imaginary in order to understand the way in which pandemic borne human extinction refashions our understanding of humanity and its place in the world the book challenges us to think how cosmological aesthetic ontological and political aspects of pandemic catastrophe are intertwined the chapters examine the vital entanglement of epidemiological studies popular culture modes of scientific visualisation and pandemic preparedness campaigns this volume will be relevant for scholars and advanced students of anthropology as well as global health and for many others interested in catastrophe the end of the world and the post apocalyptic embracing an eco friendly lifestyle can be a daunting prospect for the average urban dweller synthetic surroundings are miles away from inspiring pastoral scenes and the temptation to indulge in a spot of mindless consumerism lurks around every corner to exacerbate matters urban dwellers are generally pressed for space probably cash and definitely time this handbook aims to address these issues head on dispel the myths and provide some viable solutions although the history of organ transplant has its roots in ancient christian mythology it is only in the past fifty years that body parts from a dead person have successfully been procured and transplanted into a living person after fourteen years the three main issues that robert veatch first outlined in his seminal study transplantation ethics still remain deciding when human beings are dead deciding when it is ethical to procure organs and deciding how to allocate organs once procured however much has changed enormous strides have been made in immunosuppression alternatives to the donation model are debated much more openly living donors are used more widely and hand and face transplants have become more common raising issues of personal identity in this second edition of transplantation ethics coauthored by lainie friedman ross transplant professionals and advocates will find a comprehensive update of this critical work Cinema and Intermediality 2011-05-25

within the last two decades intermediality has emerged as one of the most challenging concepts in media theory with no shortage of various

taxonomies and definitions what prompted the writing of the essays gathered in this volume however was not a desire for more classifications applied to the world of moving pictures but a strong urge to investigate what the inter implied by the idea of intermediality stands for and what it actually entails in the cinema the book offers in each of the individual chapters a cross section view of specific instances in which cinema seems to consciously position itself in between media and arts employing techniques that tap into the multimedial complexity of cinema and bring into play the tensions generated by media differences the introductory theoretical writings deal with the historiography of approaching intermedial phenomena in cinema presenting at the same time some of the possible gateways that can open up the cinematic image towards the perceptual frames of other media and arts the book also contains essays that examine more closely specific paradigms in the poetics of cinematic intermediality like the allure of painting in hitchcock s films the exquisite ways of framing and un framing haptical imagery in antonioni s works the narrative allegories of media differences the word and image plays and ekphrastic techniques in jean luc godard s total cinema the flâneuristic intermedial gallery of moving images created by josé luis guerín or the types of intermedial metalepses in agnès varda s cinécriture from a theoretical vantage point these essays break with the tradition of thinking of intermediality in analogy with intertextuality and attempt a phenomenological re definition of intermedial relations moreover some of the analyses target films that expose the coexistence of the hypermediated experience of intermediality and the illusion of reality connecting the questions of intermediality both to the indexical nature of cinematic representation and to the specific ideological and cultural context of the films thus offering insights into a few questions regarding the politics of intermediality as well

veteran environmental journalist fred pearce used to think of invasive species as evil interlopers spoiling pristine natural ecosystems most conservationists would agree but what if traditional ecology is wrong and true environmentalists should be applauding the invaders in the new wild pearce goes on a journey to rediscover what conservation should really be about he explores ecosystems from pacific islands to the australian outback to the thames estuary digs into the questionable costs of invader species and reveals the outdated intellectual sources of our ideas about the balance of nature keeping out alien species looks increasingly flawed the new ecologists looking afresh at how species interact in the wild believe we should celebrate the dynamism of alien species and the novel ecosystems they create in an era of climate change and widespread ecological damage we must find ways to help nature regenerate embracing the new wild is our best chance

one of smithsonian magazine s favorite books of 2022 with wildlife thriving in cities we have the opportunity to create vibrant urban ecosystems that serve both people and animals the accidental ecosystem tells the story of how cities across the united states went from having little wildlife to filling dramatically and unexpectedly with wild creatures today many of these cities have more large and charismatic wild animals living in them than at any time in at least the past 150 years why have so many cities the most artificial and human dominated of all earth s ecosystems grown rich with wildlife even as wildlife has declined in most of the rest of the world and what does this paradox mean for people wildlife and nature on our increasingly urban planet the accidental ecosystem is the first book to explain this phenomenon from a deep historical perspective and its focus includes a broad range of species and cities cities covered include new york city los angeles san francisco pittsburgh austin miami chicago seattle san diego atlanta philadelphia and baltimore digging into the natural history of cities and unpacking our conception of what it means to be wild this book provides fascinating context for why animals are thriving more in cities than outside of them author peter s alagona argues that the proliferation of animals in cities is largely the unintended result of human decisions that were made for reasons having little to do with the wild creatures themselves considering what it means to live in diverse multispecies communities and exploring how human and nonhuman members of communities might thrive together alagona goes beyond the tension between those who embrace the surge in urban wildlife and those who think of animals as invasive or as public safety hazards the accidental ecosystem calls on readers to reimagine interspecies coexistence in shared habitats as well as policies that are based on just humane and sustainable approaches

this study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists in the process the discursive boundary between the factual and the speculative can become difficult to discern to elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary for what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur as turn of the century writers such as stevenson and conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both terrorist and counter terrorist operations supported by contextual readings of selected texts and films from the dynamiter and the secret agent through late victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy drawing on research from a variety of disciplines the cultural imaginary of terrorism will be a valuable resource for those with interests in the areas of literature and film terrorism studies peace and conflict studies trauma studies and cultural studies
