meeting with japan national team the dream must sound impossible the magic that comes from paying the price unlimited energy the captain role the pressure is a g hc works have appeared with important implications for the age old question of the existence of a god these writings many of which are not by theologians strengthen the rational case for the existence of a god even as this god may not be exactly the christian god of history this book brings together for the first time such recent diverse contributions from fields such as physics the philosophy of human consciousness evolutionary biology mathematics the history of religion and theology based on such new materials as well as older ones from the twentieth century it develops five rational arguments that point strongly to the very probable existence of a god they do not make use of the scientific method which is inapplicable to the question of a god rather they are in an older tradition of rational argument dating back at least to the

ancient greeks for those who are already believers the book will offer additional rational reasons that may strengthen their belief those who do not believe in the existence of a god at present will encounter new rational arguments that may cause them to reconsider their opinion

in this book victor preller examines language in the light of recent developments in american analytic philosophy the problem inherent in religious language is presented in terms of the referential status of the word god the author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role within a unified conceptual system the problem is shown to transcend the epistemological dogmas of positivism and conceptual empiricism and to be inherent in any intelligible epistemology including that of thomas aquinas whose theological treatises serve as a model of religious language for the thesis of this book according to professor preller divine science aquinas term for what we now call natural theology results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience in the science of god aquinas term for that mode of knowing engendered by faith the unknown meta empirical referent of divine science becomes the object of the human intellect while this study develops out of the discussions inaugurated by flew and mcintyre in new essays in philosophical theology it rejects the excessively empirical approach of most other studies in that tradition it applies post positivistic analysis to specifically catholic theological language but it obviously applies to the theological language involved in any form of theism

2024-01-13 in this book Victor Preller examines the logical status of religious language in the light of recent developments in american analytic philosophy the problem inherent in religious language is presented in terms of the referential status of the word god the author argues that the significance of any referential term is dependent upon the ability of that term to play a significant role within a unified conceptual system the problem is shown to transcend the epistemological dogmas of positivism and conceptual empiricism and to be inherent in any intelligible epistemology including that of thomas aquinas whose theological treatises serve as a model of religious language for the

thesis of this book according to professor preller divine science aquinas term for what we now call natural theology results from a reflection upon the limitations encountered by the intellect in its attempt to render intelligible the objects of human experience in the science of god aquinas term for that mode of knowing engendered by faith the unknown meta empirical referent of divine science becomes the object of the human intellect while this study develops out of the discussions inaugurated by flew and mcintyre in new essays in philosophical theology it rejects the excessively empirical approach of most other studies in that tradition it applies post positivistic analysis to specifically catholic theological language but it obviously applies to the theological language involved in any form of theism
