Mom Morphine and Hospice, the Puppet of the Silent Killer 2010-11 everyone deserves the opportunity to experience the joy of family love in their last months this informative book lights the way and explains what to watch for when placing someone in nursing home or hospice care mom morphine and hospice is a must read for anyone who is concerned about the safety of their parents or other loved ones you will read the story of the woman and how the choices made by each family member lead to her untimely death mom morphine and hospice chronicles the events that lead to the problems concerning morphine or other similar drugs which are often used for euthanizing patients this informative book exposes the important facts and what hidden clues to watch for in order to avoid the troubling methods used to comfort the patient

The Morphine Genocide 2016-09-30 74 pages the following account written by author m s king in collaboration with and on behalf of co author narrator al esposito a pseudonym is not merely based on a true story it is a true story one can disagree with the overall hypothesis and conclusions of course but the data points and events witnessed are all presented factually with neither embellishment nor omission only the names dates and places have been altered the use of pseudonyms for the esposito family serves only one purpose namely to shield the elderly mr esposito from the harsh possibility that his wife maria was indeed deliberately unnecessarily callously and deceptively railroaded into her grave so what should you care about the medical murder of maria esposito doesn't everyone have to go at some point after all she did live to the very ripe old age of 91 get over it al well neither she nor her husband not any of her children ever agreed to euthanizing a woman who was not terminal not brain damaged and not in pain that makes it a case a murder by deception of greater interest to the reader however is the logical inference that follows such an allegation you see if this opinion is valid then you or your own elderly parents may one day be targeted for deadly palliative care sedation upon entering an american hospice or hospital

Fast Facts for the Hospice Nurse, Second Edition 2020-09-16 provides comprehensive current information for addressing the physical psychological and spiritual needs of hospice patients and their families substantially updated and expanded the second edition of this quick access reference for hospice nurses continues to deliver the most current information on the clinical and administrative duties of the hospice nurse it encompasses important regulatory changes and milestones providing timely information on cultural issues special communication considerations and hospice care's enduring growth this resource provides new content on levels of care assessment and symptom management and occupational stress burnout and self care new treatment guidelines and algorithms are included as are updates on quality measures the reimbursement schedule compliance initiatives and electronic documentation with specific examples an indispensable clinical resource the book is a valuable reference for nurses who are seeking to specialize in hospice those who work in long term care settings post acute care settings acute care setting and those who are seeking to enhance their knowledge of end of life care within other specialties new to the second edition includes new regulatory changes milestones such as the national quality forum new priorities for action 2019 provides updated information about levels of care particularly the last 7 days rule from medicare covers the use of cannabis non pharmacological pain management interventions care of the dying patient and post mortem care new chapters are included on the hospice nurse's role as case manager patient discharge religious and cultural influences on end of life care pain assessment and interventions wound care care of the dying patient and post mortem care key features reflects key competencies for the

Walter and Miller's Textbook of Radiotherapy E-book 2012-06-29 the central problem in the study of addiction is to explain why

people repeatedly behave in ways they know are bad for them for much of the previous century and until the present day the majority of scientific and medical attempts to solve this problem were couched in terms of involuntary behaviour if people behave in ways they do not want then this must be because the behaviour is beyond their control and outside the realm of choice an opposing tradition which finds current support among scientists and scholars as well as members of the general public is that so called addictive behavior reflects an ordinary choice just like any other and that the concept of addiction is a myth the editors and authors of this book tend to take neither view there has been an increasing recognition in recent literature on addiction that restricting possible conceptions of it to either of these extreme positions is unhelpful and is retarding progress on understanding the nature of addiction and what could be done about it this book contains a range of views from philosophy neuroscience psychiatry psychology and the law on what exactly this middle ground between free choice and no choice consists of and what its implications are for theory practice and policy on addiction the result amounts to a profound change in our thinking on addiction and how its devastating consequences can be ameliorated addiction and choice is a thought provoking new volume for all those with an interest in this global issue

The Power of the Poppy 2011-02-23 build the nursing knowledge and skills you need to care for patients of all ages combining two leading lpn lvn textbooks into one volume foundations and adult health nursing 9th edition covers the fundamental skills and medical surgical content essential to providing quality care for patients across the lifespan including pediatric maternity adult and older adult patients case studies provide practice with critical thinking and clinical judgment and new next generation nclex format questions help you apply theory to practice written by nursing educators kim cooper and kelly gosnell this text also helps you prepare for success on the nclex pn examination

Impact of Demographics on Health and Healthcare 2010-09-30 when i have alzheimers is written from the personal experiences of providing care for an alzheimers patient the authors mother it includes everything the author wishes she had been told when her mother was diagnosed from the simplistic of the disease to when death is approaching the authors original reason for writing when i have alzheimers was to give simple groundwork for her husbands family if they are eventually faced with the prospect of providing care if she is diagnosed with alzheimers her hope was to provide them with some assurance and strength while they are watching the normal progression of the disease she hopes it will provide the same to you in the care of your own alzheimers patient

Addiction and Choice 2016-09-15 in the trail to tincup love stories at life s end a psychologist reckons with the loss of four family members within a span of two years hocker works backward into the lives of these people and forward into the values perspective and qualities they bestowed before and after leaving following the trail to their common gravesite in tincup colorado she remembers and recounts decisive stories and delves into artifacts journals and her own dreams in the process the grip of grief begins to lessen death braids its way into life and life informs the losses with abiding connections gradually she begins to find herself capable of imagining life without her sister and best friend toward the end of the book hocker s own near death experience illuminates how familiarity with her individual mortality helps her live with joy confidence and openness
