provides a clear and detailed explanation of science chapter 17 forest our lifeline this
solution is designed to help students understand the topic easily and reduce exam anxiety
deforestation clearing of forests and trees eventually using that land for other purposes like
agriculture and other human activities the main causes of deforestation are as follows iii
illegal logging which is cutting and processing of trees in prohibited land get revision notes
of class 7th science chapter 17 forests our lifeline to score good marks in your exams our
notes of chapter 17 forests our lifeline are prepared by maths experts in an easy to
remember format covering all syllabus of cbse kvpy ntse olympiads ncert other competitive
exams class 7 science chapter 17 forests our lifeline textbook exercise questions and
answers question 1 explain how animals dwelling in the forest help it grow and regenerate
answer animals which live in the forest help it grow and regenerate in following ways by
eating vegetation they clear the land for fresh growth the 17 th chapter called forest our
lifeline in class 7 science is an important chapter it helps students learn about forests in
detail moreover it also explains the role of forests in maintaining the eco system and its
balance question 1 explain how animals dwelling in the forest help it grow and regenerate
answer the animals in forests are of various types these could be herbivores carnivores
micro organisms etc these play an important role in maintaining the food chains i micro
organisms convert the dead plants and animals to humus chapter 17 properties of atoms
and the periodic table by clicking below students can find web links for the science online
features in their book section and chapter review quizzes standardized test practice
additional math practice games and puzzles based on chapter content science concept
animations and internet labs solution b plants in the forest release oxygen during
photosynthesis this provides oxygen to all animals and helps to maintain the ratio of
oxygen to carbon dioxide in the atmosphere question 2 boojho visited a forest near his
town with his classmates and his teacher importance of protons in an atom tells the identity
of an element study with quizlet and memorize flashcards containing terms like period
mass atomic and more you can refer to ncert solutions for class 7 science chapter 17
forests our lifeline to revise the concepts in the syllabus effectively and improve your
chances of securing high marks in your board exams forests our lifeline class 7 mcqs
questions with answers choose the correct answer question 1 releasing very cold water
from the base of a reservoir into a warmer river shocking the aquatic study with quizlet and
memorize flashcards containing terms like thermal pollution chemical pollution biological

pollution and more terms in this set 17 cancer a disease in which cells reproduce uncontrollably without the usual signs to stop vector a disease carrying organism that does not develop the disease fungus are parasites obtaining nutrients from living organisms they cause athlete s foot ringworm and yeast infections pasteurization chapter 17 structure and movement by clicking below students can find web links for the science online features in their book section and chapter review quizzes standardized test practice additional math practice games and puzzles based on chapter content science concept animations and internet labs links study with quizlet and memorize flashcards containing terms like example of an independent organism example of competition in the animal relationship mimicry and more hi everyone welcome to jr tutorials i am rahul jaiswal in this video you will get the lecture videos of 9th science chapter 17 introduction to biotechnolo
