2018-12-07 the conflict in eastern ukraine continues with little sign of a negotiated resolution crimea has been absorbed into the russian federation and celebrates the third anniversary of its integration in march 2017 the ongoing nature of the conflict contrasts with a lack of academic exploration of the

issues surrounding it to date most analyses have focused on the geopolitical implications of the ukrainian crisis such as the impact on nato russia relations and foreign policy responses to the crisis from a variety of state and supranational actors including the eu and russia the role of sub state and non state actors and implications for them has been largely overlooked this volume seeks to rectify this by examining a wide array of non state and sub state actors that have both played a role in the conflict in ukraine and been indirectly impacted by it

The Ukrainian Crisis 2021-06-08 drawing on human rights discourse and a study of the difficulties faced by religious minority groups using the ahmadiyya minority group as a case study this book presents three interconnected challenges to human rights culture in indonesia first it presents a normative challenge describing the gap between philosophical and normative principles of human rights on one side and the overall problems and critical issues of human rights at national and local levels on the other second it considers the political problems in developing and strengthening human rights culture the political challenge addresses the ability or inability of the state to guarantee the rights of certain individuals and minority groups third it examines the sociological challenge of majority minority group relationships in human rights discourse and practices this book describes the background of human rights in indonesia and reviews the previous literature on the issue it also presents a comprehensive review of the discourses

about human rights and political changes in contemporary indonesia the analysis focuses on how human rights challenges affect the situation of religious minorities looking in particular at the ahmadiyya as a minority group that experiences human rights violations such as discrimination persecution and violence the study fills out its treatment of these issues by examining the involvement of actors both from the state and society addressing also the politics of human rights protection

renewable energy is rising within an energy system dominated by powerful vested energy interests in fossil fuels nuclear and electric utilities analyzing renewables in six very different countries the author argues that it is the extent to which states have controlled these vested interests that determines the success or failure of renewables

more than 900 000 teenage girls face pregnancies each year almost all of these pregnancies are unplanned leaving teen moms and dads unprepared for the emotional physical and psychological journey ahead of them what most parents find as a memorable and positive change in their lives teens and their families often see as catastrophic and devastating in pregnancy and parenting the ultimate teen guide jessica akin guides teens through the unique issues and struggles of a life changing event that can be overwhelming even for a fully mature adult once a teen decides what course to

take between parenting adoption or abortion she must deal with the consequences of her decision often alone but sometimes with the father to be and other family members topics covered in this book include breaking the news choosing the next step dealing with judgments and criticism coping with loss co parenting finishing school life beyond the baby this book is filled with stories from teen mothers and fathers who faced their unplanned pregnancy head on written without bias or judgement pregnancy and parenting the ultimate teen guide emphasizes and encourages teens to empower themselves with knowledge and make the best choices and decisions for their individual futures

Pregnancy and Parenting 2016-09-01 a bracing and well argued study of america s college debt crisis necessary reading for anyone concerned about the fate of american higher education kirkus college is far too expensive for many people today and the confusing mix of federal state institutional and private financial aid leaves countless students without the resources they need to pay for it in paying the price education scholar sara goldrick rab reveals the devastating effect of these shortfalls goldrick rab examines a study of 3 000 students who used the support of federal aid and pell grants to enroll in public colleges and universities in wisconsin in 2008 half the students in the study left college without a degree while less than 20 percent finished within five years the cause of their problems time and again was lack of money unable to afford tuition books and living expenses they worked too many hours at outside jobs

dropped classes took time off to save money and even went without adequate food or housing in many heartbreaking cases they simply left school not with a degree but with crippling debt goldrick rab combines that data with devastating stories of six individual students whose struggles make clear the human and financial costs of our convoluted financial aid policies in the final section of the book goldrick rab offers a range of possible solutions from technical improvements to the financial aid application process to a bold public sector focused first degree free program honestly one of the most exciting books i ve read because goldrick rab has solutions it s a manual that i d recommend to anyone out there if you re a parent if you re a teacher if you re a student trevor noah the daily show

Paying the Price 2022-04-21 dark shadows is a compelling portrait of kazakhstan a country that is little known in the west strategically located in the heart of central asia sandwiched between vladimir putin s russia its former colonial ruler and xi jinping s china this vast oil rich state is carving out its place in the world as it contends with its own complex past and present journalist joanna lillis paints a vibrant picture of this emerging nation through vivid reportage based on 17 years of on the ground coverage and travels across the length and breadth of this enigmatic country that lies along the ancient silk road and at the geopolitical and cultural crossroads where east meets west featuring tales of murder and abduction intrigue and betrayal extortion and corruption this book

explores how a president Nursultan Nazarbayev transformed himself into a potentate and the economically struggling state he inherited at the fall of the USSR into a swaggering 21st century monocacy. A colourful cast of characters brings the politics to life from strutting oligarchs to sleeping villagers from principled politicians to striking oilmen from crusading journalists to courageous campaigners. This new edition features two additional chapters covering the aftermath of Nazarbayev's fall from power in 2019, the Chinese government's repressions against the Kazakhs of Xinjiang as part of its crackdown on Muslim minorities and an afterword reflecting on the tumultuous events of January 2022 in Almaty. Traversing dust-blown deserts and majestic mountains, taking in glitzy cities and dystopian landscapes, *Dark Shadows* conjures up Kazakhstan as a living, breathing place full of extraordinary people living extraordinary lives.

Dark Shadows 2016-09-09 This work is the first book-length treatment on translation policy nearly everywhere in the world. Populations are multilingual and mobile; consequently, language policies developed by the authorities must include choices about the use or non-use of translation. This book recognizes that these choices or the absence thereof become policies of their own in terms of translation. It builds upon the work of scholars in the fields of translation studies and language planning and policy in order to develop a new theoretical perspective on translation policy. In essence, the book proposes that translation policy can

be understood as the management practice and beliefs surrounding the use of translation the book deals with these issues under european and international law and then explores such management practice and beliefs in the uk as a case study ultimately the reader can find a fuller appreciation of both the importance and complexity of translation policy
