these two extremes is the main purpose of john haugeland s marvelously lucid and witty book on what artificial intelligence is all about although presented entirely in non technical terms it neither oversimplifies the science nor evades the fundamental philosophical issues far from ducking the really hard questions it takes them on one by one artificial intelligence haugeland notes is based on a very good idea which might well be right and just as well might not that idea the idea that human thinking and machine computing are radically the same provides the central theme for his illuminating and provocative book about this exciting new field after a brief but revealing digression in intellectual history haugeland systematically tackles such basic questions as what is a computer really how can a physical object mean anything what are the options for computational organization and what structures have been proposed and tried as actual scientific models for intelligence in a concluding chapter he takes up several outstanding problems and puzzles including intelligence in action imagery feelings and personality and their enigmatic prospects for solution righteous blood ruthless blades is a roleplaying game of dark adventure and heroic thrills inspired primarily by the wuxia stories of gu long players assume the roles of eccentric heroes who solve mysteries avenge misdeeds uphold justice and demonstrate profound mastery of the martial arts character creation is designed to produce fleshed out potent individuals who can follow several paths including those of the physician beggar assassin thief soldier bandit and more these characters inhabit a unique

martial world or jianghu set in a romanticized ancient china the towns temples and inns the characters can visit and the sects and factions with whom they interact will bring their own character to the game and provide a host of opportunities and threats the game is based on a simple ten sided dice pool mechanic loosely modeled on the one found in wandering heroes of ogre gate and play is designed to be gritty suspenseful and fast so the focus remains on solving mysteries and roleplaying your character when combat does arise it is consequential and swift and often resolved in a single roll of the dice this rulebook includes a sample martial world and a starting adventure as well as guidelines for games masters looking to run wuxia games and create their own unique jianghu rife with martial experts sects and mysterious locations inside you ll find hamburger and sausage gravies seafood wellington even a section on how to can bacon moore knows what she s talking about vice a beginner s guide to doomsday prepper cookbooks in a survival situation fictional or real there are certain components that are necessary to consider that will insure getting to the other side regardless of the disaster one must have food water and shelter in order to live taking that just a bit further you must have food and a means to cook it water and a means to make it potable and shelter and a means of heating it deborah d moore has been a prepper for most of her life long before the term was popular she believes in being prepared to winter in during the long cold months that the upper peninsula of michigan has to endure an entire room in her small house is devoted to food

and supply storage she has a well for water plus a filtration system in the event she has to use creek or rain water since her house is small it s easy to heat with the wood cook stove that at the same time gives her a means of cooking and baking author deborah d moore will take you on a fun step by step journey to recreate the same meals she makes every day using only what she has stored in her pantry fantastic more than a collection of recipes interspersed between chapters with recipes are snippets about life in the woods backdoor survival a modern collection of recipes that have all been regularly prepared on a woodburning range wood cookstove cooking

if a city is its people and its people are what they eat then shouldn't food play a larger role in our dialogue about how and where we live the food of a metropolis is essential to its character native plants proximity to farmland the locations of supermarkets immigration food security concerns how chefs are trained how a city nourishes

itself might say more than anything else about what kind of city it is with a cornucopia of essays on comestibles the edible city considers how one city eats it includes dishes on peaches and poverty on processing plants and public gardens on rats and bees and bad restaurant service on schnitzel and school lunches there are incisive studies of food safety policy of feeding the poor and of waste and a happy tale about a hardy fig tree together they form a saucy picture of how toronto and by extension every city sustains itself from growing basil on balconies to four star restaurants dig into the edible city and get the whole story from field to fork

machines who think how utterly preposterous huff beleaguered humanists defending their dwindling turf artificial intelligence it s here and about to surpass our own crow techno visionaries proclaiming dominion it s so simple and obvious each side maintains only a fanatic could disagree deciding where the truth lies between these two extremes is the main purpose of john haugeland s marvelously lucid and witty book on what artificial intelligence is all about although presented entirely in non technical terms it neither oversimplifies the science nor evades the fundamental philosophical issues far from ducking the really hard questions it takes them on one by one artificial intelligence haugeland notes is based on a very good idea which might well be right and just as well might not that idea the idea that human thinking and machine computing are radically the same provides the central theme for his illuminating and provocative book about this exciting new field after a brief but revealing digression in intellectual history haugeland systematically tackles such basic questions as what is a computer really how can a

physical object mean anything what are the options for computational organization and what structures have been proposed and tried as actual scientific models for intelligence in a concluding chapter he takes up several outstanding problems and puzzles including intelligence in action imagery feelings and personality and their enigmatic prospects for solution
