Clinical Manual for the Study of Diseases of the Throat

2013-09

this historic book may have numerous typos and missing text purchasers can usually download a free scanned copy of the original book without typos from the publisher not indexed not illustrated 1894 edition excerpt and the prognosis and treatment likewise prognosis the effects of the presence of new growths in the larynx are as has been said two fold namely interference with voice and interference with respiration the latter so great sometimes as to threaten life in giving a prognosis therefore both of these points must be seriously considered the hope of recovering and retaining clear voice after treatment depends largely on the size position and nature of the growth when it is single pedunculated and can be removed through the mouth the normal vocal functions will in the majority of cases be restored by its removal when the tumour is large and sessile and in the case of papillomata which tend to recur after removal clear voice after operation cannot be promised though it may and often does follow death from suffocation from the presence of benign growths in the larynx is in adults very rare and by appropriate treatment is in all cases preventible in children on the other hand prognosis is more serious on account of the smaller calibre of the larynx and from the readiness with which spasm is induced frequent attacks of laryngismus in a child associated with a husky voice or with aphonia is of grave significance and calls for active treatment treatment in considering the treatment to be adopted where there are growths in the larynx i am in the habit of dividing the subject into medicinal and surgical measures the latter being subdivided into curative and palliative procedures some few isolated instances have been reported of spontaneous cure the growth being dislodged by coughing and other cases of spontaneous disappearance have occurred while a tracheotomy tube was being worn absorption of warty

A Manual of Diseases of the Throat and Nose (Classic Reprint)

2017-07-14

excerpt from a manual of diseases of the throat and nose i have departed somewhat from the original plan of the book in treating of some subjects at considerable length as laryngeal pthisis bilateral paralysis of the abductors etc i have done this designedly with the object of introducing personal views and methods of treatment which are not given in other works and which i regard as worthy of consideration i am under obligation to dr j solis cohen of philadelphia for his kindly permission to make use of the excellent woodcuts which i have borrowed from his work 011 the throat i am also under obligation to dr morrell mackenzie for the woodcuts which i have appropriated without permission from his recent work on the throat and nose my excuse for this is that his work appeared in this country after my manuscript had been sent to the printer and the cuts have been inserted while the book has been going through the press my time was too limited to await a response and it would not have been a very gracious act to seek his permission to use them after i had
