this book fills a void for a balanced approach to spreadsheet based decision modeling in addition to using spreadsheets as a tool to quickly set up and solve decision models the authors show how and why the methods work and combine the user s power to logically model and analyze diverse decision making scenarios with software based solutions the book discusses the fundamental concepts assumptions and limitations behind each decision modeling technique shows how each decision model works and illustrates the real world usefulness of each technique with many applications from both profit and nonprofit organizations the authors provide an introduction to managerial decision modeling linear programming models modeling applications and sensitivity analysis transportation assignment and network models integer goal and nonlinear programming models project management decision theory queuing models simulation modeling forecasting models and inventory control models the additional material files chapter 12 excel files for each chapter excel modules for windows excel modules for mac 4th edition errata can be found at degruyter.com/view/product/486941

Managerial Decision Modeling

2017-08-07

for more than 20 years this title has provided scholars and students a highly accessible and teachable alternative to the dominant principle based theories in the field raymond j devettere s approach is not based on an ethics of abstract obligations and duties but following aristotle on how to live a fulfilled and happy life in short an ethics of personal well being grounded in prudence the virtue of ethical decision making

Practical Decision Making in Health Care Ethics

2016

this book describes the new perspective of naturalistic decision making the point of departure is how people make decisions in complex time pressured ambiguous and changing environments the purpose of this book is to present and elaborate on past models developed to explain this type of decision making the central philosophy of the book is that classical decision theory has been unproductive since it is so heavily grounded in economics and mathematics the contributors believe there is little to be learned from laboratory studies about how people actually handle difficult and interesting tasks therefore the book presents a critique of classical decision theory the models of naturalistic decision making described by the contributors were derived to explain the behavior of firefighters business people jurors nuclear power plant operators and command and control officers the models are unique in that they address the way people use experience to frame situations and adopt courses of action the models explain the strengths of skilled decision makers naturalistic decision research requires the examination of field settings and a section of the book covers methods for conducting meaningful research outside the laboratory in addition since his approach has applied value the book covers issues of training and decision support systems

Decision Making in Action

1992-08-01

this fully revised 4th edition of strategic marketing decision making and planning continues to set a framework for marketing decision making as a part of a holistic approach to an organisation s strategic management it integrates expanded theoretical coverage with a step by step guide to each stage of the strategy development and management processes the latest theories on how marketing strategy is conceptualised and practised are examined alongside a framework to facilitate the practical application of relevant concepts tools and techniques a series of 10 dynamic interactive modules exploring each stage of the strategic marketing process are included and new features such as learning objectives and ethics boxes further highlight the connection between theory and application continuing to bridge the gap between theory learnt and the practice of writing a marketing plan or report strategic marketing decision making and planning 4e is an invaluable resource for students and practitioners alike
