if you go to the scottish highlands now you will find many valleys almost without people yet we know from history and archaeology that many people lived in the highlands for thousands of years what

happened between about 1740 and 1900 the highland landlords decided to clear out the people and establish great sheep farms instead five volumes will tell the story starting with volume one clans and clearance in highland histories some beliefs though clearly at odds with the evidence re appear regularly all these and other misapprehensions are dealt with in clans and clearance e g there was an enormous highland population increase in the century after 1750 this never happened the highest possible increase is 37 in the years 1750 1840 during which time food production doubled or trebled some figures in original documents are clearly inaccurate but have been accepted by writers who feel that documents cannot lie they claim that highland parishes averaged 400 square miles this is clearly wrong and can be disproved by anyone who has an atlas and a ruler the average was about 100 square miles the clearances were carried out by the english in reality they were carried out by the clan chiefs after the lowlanders and the english conquered the highlands following the battle of culloden 1746 the british state forced the private property system on to the highlanders the clan chiefs were made into landowners who suddenly realized they could make themselves rich by driving out the clansfolk and letting the land to large farmers most of the highlanders were catholics in fact 96 of the highlanders were protestant the old highlanders were crofters in fact the highlanders were hunter gatherers with a second ample food source in their vast flocks and herds the crofters appeared only after the clearances when some of the evicted were kindly allowed to try growing potatoes in an acre of two of barren waste ground the clan chiefs were tyrants jailing and executing clansfolk indiscriminately no the chiefs had no state apparatus police soldiers lawyers courts jails torturers executioners etc so had to rule with the general approval of the clansfolk the highlanders cattle lived under

the same roof as the highlanders no the herds far too large this only happened after the clearances when herds no longer had enough pasture for their great flocks and therefore had very few animals left and very little grazing so the cow had to be housed in the same building the clansfolk were wildly licentious drinking enormous quantities of whisky while at the same time they fervently believed in a strait laced religion no both these opposite convulsions appeared as extreme reactions to the social misery caused by the clearances

this new approach to highland history before the clearances draws attention to little studied yet important economic and social processes within the highland clan system and argues that we should consider the problems of traditional highland society economy and environment together exploring how the different aspects of the clan system chiefs and kinsmen landlords and tenants farming systems production strategies and marketing changed between the 16th 18th centuries it shows how the character and ideology of clans and chiefdoms are inextricably part of the twin problems of socio political control and food production shifting the emphasis away from depictions of highland society as lawless and disorganised this is a welcome antidote to the many romanticised views of pre clearance society prize winner honorable mention frank watson scottish history prize 1999
